Construction Supply Chain Economics - Kerry London 2007-12-11

This is the first comprehensive investigation of the industrial sourcing and procurement practices throughout sixty-eight construction industry supply channels across seven major commodity sectors at all levels. London presents real-world case studies to combine theory and practice to describe the economic structural and behavioural characteristics of sectors integral to the construction industry performance.

Construction Supply Chain Economics details 'everyday' experiences and procurement decisions made by people in firms in the industry related to projects as they seek out other firms to work with during the tendering stage. London creates a language that enables us to classify and understand behaviour and recognise the impact of our decisions on firms and projects within the industry. Construction Supply Chain Economics introduces a new model for mapping the construction sector of particular interest to construction management and economic researchers and to procurement decision makers, including policymakers and clients, as well as industry practitioners, such as contractors, consultants and materials suppliers.

Post-Unification Turkish German Cinema - Gozde Naiboglu 2018-01-10

This book offers a post-representational approach to a range of fiction and non-fiction films that deal with labour migration from Turkey to Germany. Engaging with materialist philosophies of process, it offers analyses of films by Thomas Arslan, Christian Petzold, Aysun Bademsoy, Seyhan Derin, Harun Farocki, Yüksel Yavuz and Feo Aladag. Shifting the focus from the longstanding concerns of integration, identity and cultural conflict, Gozde Naiboglu shows that these films offer new expressions of lived experience under late capitalism through themes of work, social reproduction, unemployment and insecure work, exhaustion and precarity, thereby calling for a rethinking of the established ideas of class, community and identity.
