post-partition era in Pakistan. He takes the reader through the ups and downs of his life and his experiences across the world. The book is his journey to his roots and through the challenges of a migrant family. Growing up amid poverty with enclaves of abundance within this poverty, the author recounts in this autobiography the migration back and forth to and from USA. As he does so, he observes poverty amid the abundance around him in the US and sees this impacting the most in health care in which he has been intrinsically embedded throughout his life. These pockets of poverty in the US are not necessarily due to limited resources but more because of lack of commitment and dysfunctional priorities we have at an individual, societal, and national level. Society and Psychosis - Craig Morgan 2008-03-20

Psychiatry is in the process of rediscovering its roots. It seemed as if the long history of interest in the impact of society on the rates and course of serious mental illness had been forgotten, overtaken by the advances of neuroscience and genetics. However, as our knowledge of physiological and genetic processes improves it becomes increasingly clear that social conditions and experiences over the life course are crucial to achieving a full understanding. Old controversies are giving way to genuinely integrated models in which social, psychological and biological factors interact over time, culminating in the onset of psychosis. This book reviews these issues from an international perspective, laying the foundations for a new understanding of the psychotic disorders, with profound implications for health policy and clinical practice. It should be read by all members of the mental health team and those responsible for service organization and management.

Mental Health and Crime - Jill Peay 2010-10-04

Does mental disorder cause crime? Does crime cause mental disorder? And if either of these could be proved to be true what consequences should stem for those who find themselves deemed mentally disordered offenders? Mental Health and Crime examines the nature of the

relationship between mental disorder and crime. It concludes that the broad definition of what is an all too common human condition - mental disorder - and the widespread occurrence of an equally all too common human behaviour - that of offending - would make unlikely any definitive or easy answer to such questions. For those who offend in the context of mental disorder, many aspects of the criminal justice process, and of the disposals that follow, are adapted to take account of a relationship between mental disorder and crime. But if the very relationship is questionable, is the way in which we deal with such offenders discriminatory? Or is it perhaps to their benefit to be thought of as less responsible for their offending than fully culpable offenders? The book thus explores not only the nature of the relationship, but also the human rights and legal issues arising. It also looks at some of the permutations in the therapeutic process that can ensue when those with mental health problems are treated in the context of their offending behaviour.

Tweed Rivers - Ken Cockburn 2005

A book of thoughts, of dreams and visions. A book of birdsong and the quick flash of the salmon...A handful of pearls. There are many stories needing to be told about this 'Land of Tension', this frontier region, where ancient continents, historical political systems and armed hosts have clashed to bequeath a rich legacy which is recalled in song and etched into the very fabric of castles and towers. This project addresses this need through interpretation of key sites along the Tweed and its tributaries. Combining poetry, essays and short prose as well as a variety of visual media from etchings and woodcuts through watercolours and acrylics to colour, black & white and pinhole photography, Tweed Rivers presents a contemporary reaction to this landscape, throwing over it - as Wordsworth would have had it - 'a certain colouring of the imagination'. Key features include: the project involves myriad organisations: The Scottish Borders Council, Scottish Natural Heritage, Scottish Borders Enterprise, Tweed Forum, Scottish Tourist Board and Forest Enterprise; with a very few exceptions, all the work included was made especially for this project by accomplished authors and artists and is being published for the first time. part-financed by the Heritage Lottery Fund and the European Union allowing for many colour plates at a low price, and published in association with platform projects. Who will buy this book? Those regular visitors to, and residents of, the area who will enjoy new perspectives on a familiar landscape; people interested in the natural world; writers, artists and readers who are interested in contemporary as well as traditional techniques, styles and subject matters.
