Ancient Civilizations of Africa - G. Mokhtar 1981-01-01

Deals with the period beginning at the close of the Neolithic era, from around the eighth millennium before our era. This period of some 9,000 years of history has been sub-divided into four major geographical zones, following the pattern of African historical research. Chapters 1 to 12 cover the corridor of the Nile, Egypt and Nubia. Chapters 13 to 16 relate to the Ethiopian highlands. Chapters 17 to 20 describe the part of Africa later called the Maghrib and its Saharan hinterland. Chapters 21 to 29, the rest of Africa as well as some of the islands of the Indian Ocean.--Publisher's description

Toward the African Revolution - Frantz Fanon 1988

[The Science of Melanin](#) - T. Owens Moore 2004-01-01

The Millionaire Fastlane - MJ DeMarco 2011-01-04

10TH ANNIVERSARY EDITION Is the financial plan of mediocrity -- a dream-stealing, soul-sucking dogma known as "The Slowlane" your plan for creating wealth? You know how it goes; it sounds a lil something like this: "Go to school, get a good job, save 10% of your paycheck, buy a used car, cancel the movie channels, quit drinking expensive Starbucks mocha lattes, save and penny-pinch your life away, trust your life-savings to the stock market, and one day, when you are oh, say, 65 years old, you can retire rich." The mainstream financial gurus have sold you blindly down the river to a great financial gamble: You've been hoodwinked to believe that wealth can be created by recklessly trusting in the uncontrollable and unpredictable markets: the housing market, the stock market, and the job market. This impotent financial gamble dubiously promises wealth in a wheelchair -- sacrifice your adult life for a financial plan that reaps dividends in the twilight of life. Accept the Slowlane as your blueprint for wealth and your financial future will blow carelessly asunder on a sailboat of HOPE: HOPE you can find a job and keep it, HOPE the stock market doesn't tank, HOPE the economy rebounds, HOPE, HOPE, and HOPE. Do you really want HOPE to be the centerpiece for your family's financial plan? Drive the Slowlane road and you will find your life deteriorate into a miserable exhibition about what you cannot do, versus what you can. For those who don't want a lifetime subscription to "settle-for-less" and a slight chance of elderly riches, there is an alternative; an expressway to extraordinary wealth that can burn a trail to financial independence faster than any road out there. Why jobs, 401(k)s, mutual funds, and 40-years of mindless frugality will never make you rich young. Why most entrepreneurs fail and how to immediately put the odds in your favor. The real law of wealth: Leverage this and wealth has no choice but to be magnetized to you. The leading cause of poorness: Change this and you change everything. How the rich really get rich - and no, it has nothing to do with a paycheck or a 401K match. Why the guru's grand deity - compound interest - is an impotent wealth accelerator. Why the guru myth of "do what you love" will most likely keep you poor, not rich. And 250+ more poverty busting distinctions... Demand the Fastlane, an alternative road-to-wealth; one that actually ignites dreams and creates millionaires young, not old. Change lanes and find your explosive wealth accelerator. Hit the Fastlane, crack the code to wealth, and find out how to live rich for a lifetime.

Afrofuturism - Ytasha L. Womack 2013-10-01

2014 Locus Awards Finalist, Nonfiction Category In this hip, accessible primer to the music, literature, and art of Afrofuturism, author Ytasha Womack introduces readers to the burgeoning community of artists creating Afrofuturist works, the innovators from the past, and the wide range of subjects they explore. From the sci-fi literature of Samuel Delany, Octavia Butler, and N. K. Jemisin to the musical cosmos of Sun Ra, George Clinton, and the Black Eyed Peas' will.i.am, to the visual and multimedia artists inspired by African Dogon myths and Egyptian deities, the book's topics range from the "alien" experience of blacks in America to the "wake up" cry that peppers sci-fi literature, sermons, and activism. With a twofold aim to entertain and enlighten, Afrofuturists strive to break down racial, ethnic, and social limitations to empower and free individuals to be themselves.

When Doctors Kill - Joshua A. Perper 2010-06-14

It would come as no surprise that many readers may be shocked and intrigued by the title of our book.

Some (especially our medical colleagues) may wonder why it is even worthwhile to raise the issue of killing by doctors. Killing is clearly unethical to the Art and Science of Medicine, which is geared toward easing pain and suffering and to saving lives rather than smothering them. Doctors should be a source of comfort rather than a cause for alarm. Nevertheless, although they often don't want to admit it, doctors are people too. Physicians have the same genetic library of both endearing qualities and character defects as the rest of us but their vocation places them in a position to intimately interject themselves into the lives of other people. In most cases, fortunately, the positive traits are dominant and doctors do more good than harm. While physicists and mathematicians paved the road to the stars and deciphered the mysteries of the atom, they simultaneously unleashed destructive powers that may one day bring about the annihilation of our planet. Concurrently, doctors and allied scientists have delved into the deep secrets of the body and mind, mastering the anatomy and physiology of the human body, even mapping the very molecules that make us who we are. But make no mistake, a person is not simply an elegant biological machine to be marveled at then dissected.

Made to Stick - Chip Heath 2007-01-02

NEW YORK TIMES BESTSELLER • The instant classic about why some ideas thrive, why others die, and how to make your ideas stick. "Anyone interested in influencing others—to buy, to vote, to learn, to diet, to give to charity or to start a revolution—can learn from this book."—The Washington Post Mark Twain once observed, "A lie can get halfway around the world before the truth can even get its boots on." His observation rings true: Urban legends, conspiracy theories, and bogus news stories circulate effortlessly. Meanwhile, people with important ideas—entrepreneurs, teachers, politicians, and journalists—struggle to make them "stick." In *Made to Stick*, Chip and Dan Heath reveal the anatomy of ideas that stick and explain

ways to make ideas stickier, such as applying the human scale principle, using the Velcro Theory of Memory, and creating curiosity gaps. Along the way, we discover that sticky messages of all kinds—from the infamous “kidney theft ring” hoax to a coach’s lessons on sportsmanship to a vision for a new product at Sony—draw their power from the same six traits. Made to Stick will transform the way you communicate. It’s a fast-paced tour of success stories (and failures): the Nobel Prize-winning scientist who drank a glass of bacteria to prove a point about stomach ulcers; the charities who make use of the Mother Teresa Effect; the elementary-school teacher whose simulation actually prevented racial prejudice. Provocative, eye-opening, and often surprisingly funny, Made to Stick shows us the vital principles of winning ideas—and tells us how we can apply these rules to making our own messages stick.

From #BlackLivesMatter to Black Liberation - Keeanga-Yamahtta Taylor 2016-02-01

The author of Race for Profit carries out “[a] searching examination of the social, political and economic dimensions of the prevailing racial order” (Michelle Alexander, author of The New Jim Crow). In this winner of the Lannan Cultural Freedom Prize for an Especially Notable Book, Keeanga-Yamahtta Taylor “not only exposes the canard of color-blindness but reveals how structural racism and class oppression are joined at the hip” (Robin D. G. Kelley, author of Freedom Dreams). The eruption of mass protests in the wake of the police murders of Michael Brown in Ferguson, Missouri, and Eric Garner in New York City have challenged the impunity with which officers of the law carry out violence against black people and punctured the illusion of a post-racial America. The Black Lives Matter movement has awakened a new generation of activists. In this stirring and insightful analysis, activist and scholar Keeanga-Yamahtta Taylor surveys the historical and contemporary ravages of racism and the persistence of structural inequality, such as mass incarceration and black unemployment. In this context, she argues that this new struggle against police violence holds the potential to reignite a broader push for black liberation. “This brilliant book is the best analysis we have of the #BlackLivesMatter moment of the long struggle for freedom in America. Keeanga-Yamahtta Taylor has emerged as the most sophisticated and courageous radical intellectual of her generation.” —Dr. Cornel West, author of Race Matters “A must read for everyone who is serious about the ongoing praxis of freedom.” —Barbara Ransby, author of Ella Baker and the Black Freedom Movement “[A] penetrating, vital analysis of race and class at this critical moment in America’s racial history.” —Gary Younge, author of The Speech: The Story Behind Dr. Martin Luther King Jr.’s Dream
Jazzy Melanin - Carol Barnes 1993-01-01

The Black Atlantic - Paul Gilroy 1993

This text sketches a critical account of the location of black intellectuals in the modern world following the end of racial slavery. The book explores the reactions of black writers to modernity's colour-coded promises, demonstrating the value of a politicized post-modernism in re-reading black cultural politics and political culture. The lives and writings of key African Americans such as Martin Delany, W.E.B. Dubois, Frederick Douglas and Richard Wright are examined in the light of their experiences outside the US in Europe and Africa. Gilroy provides an extensive discussion of black vernacular cultures, especially music.

Black Bodies, White Gazes - George Yancy 2016-11-02

Following the deaths of Trayvon Martin and other black youths in recent years, students on campuses across America have joined professors and activists in calling for justice and increased awareness that Black Lives Matter. In this second edition of his trenchant and provocative book, George Yancy offers students the theoretical framework they crave for understanding the violence perpetrated against the Black body. Drawing from the lives of Ossie Davis, Frantz Fanon, Malcolm X, and W. E. B. Du Bois, as well as his own experience, and fully updated to account for what has transpired since the rise of the Black Lives Matter movement, Yancy provides an invaluable resource for students and teachers of courses in African American Studies, African American History, Philosophy of Race, and anyone else who wishes to examine what it means to be Black in America.

The Hero with an African Face - Clyde W. Ford 2000-01-04

In this remarkable book, Clyde Ford restores to us the lost treasure of African mythology, bringing to life the ancient tales and showing why they matter so much to us today. African myths convey the perennial wisdom of humanity: the creation of the world, the hero's journey, our relationship with nature, death, and

resurrection. From the Ashanti comes the moving account of the grief-stricken Kwasi Benefo's journey to the underworld to seek his beloved wives. From Uganda we learn of the legendary Kintu, who won the love of a goddess and created a nation from a handful of isolated clans. The Congo's epic hero Mwindo is the sacred warrior who shows us the path each person must travel to discover his true destiny. These and other important African myths show us the history of African Americans in a new light—as a hero's journey, a courageous passage to a hard-won victory. The Hero with an African Face enriches us all by restoring this vital tradition to the world.

The Melanin Empath - Jade Asikiwe 2020-07-29

Black Lives Matter at School - Denisha Jones 2020-12-01

After a powerful webinar that included educators from ten cities explaining the many incredible actions they took in support of the national Black Lives Matter at School week of action, Denisha Jones, contacted Jesse Hagopian to propose that they collect these stories in a book. Black Lives Matter at School succinctly generalizes lessons from successful challenges to institutional racism that have been won through the BLM at School movement. This is a book that can inspire many hundreds or thousands of more educators to join the BLM at School movement.

Melanin: - Richard D. King 2012-03-03

A Study of ancient African history reveals an early African definition of the human Melanin System as a whole body Black Melanin System that serves as the eye of the soul to produce inner vision, true spiritual consciousness, creative genius, beatific vision, to become Godlike, and to have conversation with the immortals (Ancestors). The purpose of ancient African education was to provide knowledge and development of the will of the student that allowed salvation (freedom) of the soul from the fetters (chains) of the physical body (George G. Critical Path - R. Buckminster Fuller 1982-02-15

The masterwork of a brilliant career, and an important document of the crisis now facing mankind. Today we find ourselves in the midst of the greatest crisis in the history of the human race. Technology has placed in our hands almost unlimited power at the very moment when we have run up against the limits of our resources aboard Spaceship Earth, as the crises of the late twentieth century—political, economic, environmental, and ethical—determine whether or not humanity survives. In this masterful summing up of an entire lifetime’s thought and concern, R. Buckminster Fuller addresses these crucial issues in his most significant, accessible, and urgent work. Critical Path traces the origins and evolution of humanity’s social, political, and economic systems from the obscure mists of prehistory, through the development of the great political empires, to the vast international corporate and political systems that control our destiny today to show how we got to our present situation and what options are available to man. With his customary brilliance, extraordinary energy, and unlimited devotion, Bucky Fuller shows how mankind can survive, and how each individual can respond to the unprecedented threat we face today. The crowning achievement of an extraordinary career, Critical Path offers the reader the excitement of understanding the essential dilemmas of our time and how responsible citizens can rise to meet this ultimate challenge to our future.

From Atlantis to the Sphinx - Colin Wilson 2004-07-01

In this compelling book, Colin Wilson argues that thousands of years before ancient Egypt and Greece held sway, there was a great civilization whose ships traveled the world from China to Antarctica. Their advanced knowledge of science, mathematics, and astronomy was passed on to descendants who escaped to Egypt and South America. From Atlantis to the Sphinx bases this assertion on a true fact: that archaeologists and geologists are at odds over the age of the Sphinx. Archaeologists claim that the Sphinx dates to classical dynastic Egypt, around 2,400 b.c. But some geologists claim that it could have been built as early as 7,000 to 10,500 b.c. The geologists' claim is based on the curious fact that the erosion of the Sphinx is more characteristic of water erosion than that of wind and sand. Starting from the assumption that there was an advanced civilization in existence much earlier than previously thought, Wilson goes on to claim that it could very well be Atlantis--not a literal island that sank, but more of a great civilization that either declined naturally or experienced a great catastrophe, passing on only a fraction of its knowledge to other peoples. From Atlantis to the Sphinx delves into what might have been a completely different knowledge system from that of modern man--one as alien to us as that of the Martians. The book sets out to reconstruct that ancient knowledge in a fascinating exploration of the remote depths of history, a groundbreaking attempt to understand how these long-forgotten peoples thought, felt, and communicated with the universe.

Blacked Out Through Whitewash - Suzar 1999-12-01

The Art of Being Human - Michael Wesch 2018-08-07

Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

Before the Mayflower - Lerone Bennett 2018-08-09

This book grew out of a series of articles which were published originally in Ebony magazine. The book, like the series, deals with the trials and triumphs of a group of Americans whose roots in the American soil are deeper than those of the Puritans who arrived on the celebrated "Mayflower" a year after a "Dutch man of war" deposited twenty Negroes at Jamestown. This is a history of "the other Americans" and how they came to North America and what happened to them when they got here. The story begins in Africa with the great empires of the Sudan and Nile Valley and ends with the Second Reconstruction which Martin Luther King, Jr., and the "sit-in" generation are fashioning in the North and South. The story deals with the rise and growth of slavery and segregation and the continuing efforts of Negro Americans to answer the question of the Jewish poet of captivity: "How shall we sing the Lord's song in a strange land?" This history is founded on the work of scholars and specialists and is designed for the average reader. It is not, strictly speaking, a book for scholars; but it is as scholarly as fourteen months of research could make it. Readers who would like to follow the story in greater detail are urged to read each chapter in connection with the outline of Negro history in the appendix.

Philosophical and Spiritual Perspectives on Decent Work - International Labour Organization 2004

This volume reflects on the values behind the ILO's Decent Work Agenda and provides a forum for contributors from various humanistic, philosophical, spiritual and religious traditions to express their views on the significance of work at all levels of society, from the individual person to the global community. Common, universal values are explored, as well as differences, in order to shed more light on the concept of decent work. In all societies, there is an ethical dimension to work, connected to the rights and entitlements of those who perform it. This also includes spiritual value such as dignity, personal identity, a sense of purpose in life, the "divine call to work" and so on. In this book, contributors - from the Jewish, Christian, Muslim, Hindu, Buddhist, Confucian, and various secular traditions - come together to exchange comments and reflections on the "floor" of decency as defined by the ILO: freedom of association, eradication of forced and compulsory labour, abolition of child labour and elimination of discrimination in respect of employment and occupation. It is hoped that this type of approach will be inspiring. Before embarking on major international strategic papers, legal instruments and public policies, the systematic consultation of an interfaith and humanistic forum would enable cultural and religious views to be taken into consideration. In this way such instruments would be anchored in shared values and not influenced by any one dominant conception of human existence in the world.

Religion of White Rage - Finley Stephen C. Finley 2020-09-21

Critically analyses the historical, cultural and political dimensions of white religious rage in America, past and present This book sheds light on the phenomenon of white rage, and maps out the uneasy relationship between white anxiety, religious fervour, American identity and perceived black racial progress. Contributors to the volume examine the sociological construct of the "white labourer", whose concerns and beliefs can be understood as religious in foundation, and uncover that white religious fervor correlates to notions of perceived white loss and perceived black progress. In discussions ranging from the Constitution to the Charlottesville riots to the evangelical community's uncritical support for Trump, the authors of this collection argue that it is not economics but religion and race that stand as the primary motivating factors for the rise of white rage and white supremacist sentiment in the United States.

The Gastro-Archeologist - Jeremy Woodward 2021-02-03

In order to understand common conditions such as coeliac disease and Crohn's disease, one must view the gut in its evolutionary context. This is the novel approach to the gut and its diseases that is adopted in this book. The first part tells the story of the evolution of the gut itself - why it came about and how it has influenced the evolution of animals ever since. The second part focuses on the evolution of immunity and how the layers of immune mechanisms are retained in the gut, resembling the strata revealed in an archeological dig. The final part, 'The Gastro-Archeologist', ties the first two together and highlights how understanding the gut and immune system in their evolutionary context can help us understand diseases affecting them. Ambitious in its scope but telling a unique story from a refreshingly novel perspective, the book offers an informative and enjoyable read. As the story of the gut, immunity and disease unfolds, the author aims to endow readers with the same sense of awe and excitement that the subject evokes in him. Difficult concepts are illustrated using simple and colourful analogies, and the main content is

supplemented with anecdotes and unusual and amusing facts throughout the book. The book is intended for anyone with an interest in the gut, its immunity and diseases, ranging from school and college biology and biomedical students, to professionals working in the field, and to patients suffering from intestinal diseases who want to understand more about their conditions.

Black Lives & Brown Freedom: Untold Histories of War, Solidarity, & Genocide - Kirby Araullo 2018
"An African American soldier "beheaded" deep in the jungle, a volcano crater filled with hundreds of desperate refugees, and church bells tainted with horrific bloodshed in the howling wilderness... What went on in the islands of the Philippines between 1899 to 1913? "Black Lives & Brown Freedom: Untold Histories of War, Solidarity, & Genocide" vividly engages its readers with the almost forgotten experiences and bond between Filipinos and African Americans in the events surrounding the Philippine-American War"--Page [4] of cover.

Post Traumatic Slave Syndrome - Joy a Degruy 2017-09-11

In the 16th century, the beginning of African enslavement in the Americas until the ratification of the Thirteenth Amendment and emancipation in 1865, Africans were hunted like animals, captured, sold, tortured, and raped. They experienced the worst kind of physical, emotional, psychological, and spiritual abuse. Given such history, isn't it likely that many of the enslaved were severely traumatized? And did the trauma and the effects of such horrific abuse end with the abolition of slavery? Emancipation was followed by one hundred more years of institutionalized subjugation through the enactment of Black Codes and Jim Crow laws, peonage, convict leasing, domestic terrorism and lynching. Today the violations continue, and when combined with the crimes of the past, they result in yet unmeasured injury. What do repeated traumas, endured generation after generation by a people produce? What impact have these ordeals had on African Americans today? Dr. Joy DeGruy, answers these questions and more. With over thirty years of practical experience as a professional in the mental health field, Dr. DeGruy encourages African Americans to view their attitudes, assumptions, and behaviors through the lens of history and so gain a greater understanding of how centuries of slavery and oppression have impacted people of African descent in America. Post Traumatic Slave Syndrome helps to lay the necessary foundation to ensure the well-being and sustained health of future generations and provides a rare glimpse into the evolution of society's beliefs, feelings, attitudes and behavior concerning race in America.

Race and Membership in American History - Alan Stoskopf 2002

Focuses on a time in the early 1900's when many people believed that some "races", classes and individuals were superior to others. A new branch of scientific inquiry known as Eugenics was used to justify these prejudices and advocate programs and policies aimed at solving the nation's problems by ridding society of "inferior racial traits".

The Black Sun - Stanton Marlan 2008-05-08

Also available in an open-access, full-text edition at <http://oaktrust.library.tamu.edu/handle/1969.1/86080>
The black sun, an ages-old image of the darkness in individual lives and in life itself, has not been treated hospitably in the modern world. Modern psychology has seen darkness primarily as a negative force, something to move through and beyond, but it actually has an intrinsic importance to the human psyche. In this book, Jungian analyst Stanton Marlan reexamines the paradoxical image of the black sun and the meaning of darkness in Western culture. In the image of the black sun, Marlan finds the hint of a darkness that shines. He draws upon his clinical experiences—and on a wide range of literature and art, including Goethe's Faust, Dante's Inferno, the black art of Rothko and Reinhardt—to explore the influence of light and shadow on the fundamental structures of modern thought as well as the contemporary practice of analysis. He shows that the black sun accompanies not only the most negative of psychic experiences but also the most sublime, resonating with the mystical experience of negative theology, the Kabbalah, the Buddhist notions of the void, and the black light of the Sufi Mystics. An important contribution to the understanding of alchemical psychology, this book draws on a postmodern sensibility to develop an original understanding of the black sun. It offers insight into modernity, the act of imagination, and the work of analysis in understanding depression, trauma, and transformation of the soul. Marlan's original reflections help us to explore the unknown darkness conventionally called the Self. When We Ruled - Robin Walker 2006

Ancient Egyptian Book of the Dead - E. A. Wallis Budge 2016-11-28

Presented in easy-to-understand sections, with this book you will discover the magic of ancient Egypt in this comprehensive translation of the real Egyptian Book of the Dead. Ancient Egyptian Book of the Dead is a compendium of classic texts by one of the greatest translators and historians of ancient Egypt, as well as one of the most renowned Egyptologists of all time, E.A. Wallis Budge. In Part I, using plain, simple, easy-to-understand language, Budge delves into the history, instructions, motifs, themes, spells, incantations, and charms written for the dead that ancient Egyptians would need to employ to pass from this world into the next. Throughout centuries, these "books of the dead man" were often found buried alongside mummies and inside tombs, which locals and grave robbers would collect. In Part II, Budge's classic translation of the Book of the Dead from the Papyrus of Ani (and others) is presented in its original format and contains the prayers, incantations, and ancient text used to help guide the dead during their journey. Finally, in Part III, a list of Egyptian deities is provided. Illustrated throughout with great care, including photos, fine art, and other illustrations, this edition will bring the historic afterlife guide back to life.

The Melanin Apocalypse - Darrell Bain 2008

A man-made virus is killing all the blacks in the world. The African continent is devolving into complete chaos. Blacks in America begin rioting and killing Whites. Israel and the Arab states go to war again. The oil fields of the Middle East and Africa are up for grabs... The Center for Disease Control in Atlanta provides the only possible bulwark against the whole world falling into anarchy. Unfortunately, the CDC comes under attack by mobs of angry, sick and dying blacks while scientists inside search desperately for a cure. "Darrell Bain has given us another winner. The science fiction community is lucky to have him. I say read this book." -- Travis S. "Doc" Taylor, author of The Tau Ceti Agenda
