Back to Venice - Michael Grant 2011-05-26

Imagine what it would be like to go back in time

to the 15th century Venice. And imagine what it would be like to meet your lifelong hero, Michelangelo. And imagine what it would be like if, on first meeting, you spill a tray of pasta and wine on that very same hero. Well, that's what happens to serious young artist Mark Breen. As the result of a drunken bet, Mark knocks out a painting of a toilet bowl. Much to his amazement, he sells it. In short order he's hailed as the new Andy Warhol and becomes an overnight sensation-and a very wealthy man. Soon, images of his toilet bowls are on more t-shirts, mugs, and calendars than Edvard Munch's *The Scream*. His friend and mentor, Hugh Connelly, afraid that Mark is in danger of losing his "artistic soul," advises him to go back to Italy and reacquaint himself with the "old masters." In Venice, Mark falls in love with Alexandra, a beautiful art restorer, but it's a one-sided affair. One night, hoping to win her over, he climbs up on a roof to find out who painted her favorite fresco. He falls off the roof and wakes up in 15th century Venice where he meets an innkeeper named Francesca, who looks exactly like Alexandra. And it gets curiously and curiously from there. During his stay-which is sometimes zany and sometimes frightening-he meet his hero, Michelangelo, who teaches him the true meaning of art.

Sequencing - Michael Metzger 2010-04

Watson and Crick discovered the human DNA. What made the difference was deciphering it. Like the human body, every organization has a DNA. What will make the difference is not seeing it, but sequencing it. It's the key to long-term success at innovation. Sequencing, written by business consultant Michael Metzger, explores what is required for a company to develop a culture that promotes innovation for the long haul. Harvard's Clayton Christensen reports that few companies have the capacity to innovate. The more success a company achieves, the harder it is for the company to innovate. And yet the reality is that companies innovate or die. Metzger outlines the steps necessary to sustain innovation - the culture, conscience, and C-level leadership required. It begins by having an accurate assessment of human nature and reality. Institutional leaders ignore this book at their peril.
