The Valentine Estate - Stanley Ellin 2018-01-14

There was a time when Davis Cup winner Chris Monte had it all. Now, down and out in Dade County, restringing racquets at a South Beach tennis shop and hiring himself out for an

occasional lesson, he's dead broke. Then, along comes Elizabeth Jones, a mousy student with an irresistible proposition: fifty thousand dollars in exchange for marrying her. As sole beneficiary of the Valentine estate, Elizabeth is set to inherit a fortune. There's only one stipulation: She must be married. She'll collect, they'll divorce, and Chris will get paid off. Simple. But there are a few details Elizabeth left out, including the other claimants who are ruthlessly scheming to get their shares; her former boss, a goon with shady connections; her institutionalized mother, the target of whispers and gossip; the syndicate representative behind the execution of the will; and the pressing question of the actual identity of the deceased. Before long, Chris is in over his head. And wondering what his real part is in this twisted game of family secrets, Chris has good reason to fear that in agreeing to marry Elizabeth, he's set in motion the carefully drawn plans for his own murder. From a Mystery Writers of America Grand Master, *The Valentine Estate* is a gripping thriller and was named an Edgar Award finalist for Best Novel.

A Statistical Account of Bengal - Sir William Wilson Hunter 1875

Time-Series Forecasting - Chris Chatfield
2000-10-25

From the author of the bestselling "Analysis of Time Series," *Time-Series Forecasting* offers a comprehensive, up-to-date review of forecasting methods. It provides a summary of time-series modelling procedures, followed by a brief catalogue of many different time-series forecasting methods, ranging from ad-hoc methods through ARIMA and state-space modelling to multivariate methods and including recent arrivals, such as GARCH models, neural networks, and cointegrated models. The author compares the more important methods in terms of their theoretical inter-relationships and their practical merits. He also considers two other general forecasting topics that have been somewhat neglected in the literature: the computation of prediction intervals and the effect of model uncertainty on forecast accuracy. Although the search for a "best" method continues, it is now well established that no single method will outperform all other methods in all situations—the context is crucial. Time-

Series Forecasting provides an outstanding reference source for the more generally applicable methods particularly useful to researchers and practitioners in forecasting in the areas of economics, government, industry, and commerce.

Latent Variable Path Modeling with Partial Least Squares - Jan-Bernd Lohmöller

2013-11-11

Partial Least Squares (PLS) is an estimation method and an algorithm for latent variable path (LVP) models. PLS is a component technique and estimates the latent variables as weighted aggregates. The implications of this choice are considered and compared to covariance structure techniques like LISREL, COSAN and EQS. The properties of special cases of PLS (regression, factor scores, structural equations, principal components, canonical correlation, hierarchical components, correspondence analysis, three-mode path and component analysis) are examined step by step and contribute to the understanding of the general PLS technique. The proof of the convergence of the PLS algorithm is extended beyond two-block models. Some 10 computer programs and 100 applications of PLS are referenced. The book gives the statistical underpinning for the computer programs PLS 1.8, which is in use in some 100 university computer centers, and for PLS/PC. It is intended to be the background reference for the users of PLS 1.8, not as textbook or program manual.

Defining Pre-Raphaelite Poetics - Heather Bozant Witcher 2021-11-27

Defining Pre-Raphaelite Poetics offers a range of Pre-Raphaelite literary scholarship, provoking innovative discussions into the poetic form, gender dynamics, political engagement, and networked communities of Pre-Raphaelitism. The authors in this collection position Pre-Raphaelite poetics broadly in the sense of poiesis, or acts of making, aiming to identify and explore the Pre-Raphaelites' diverse forms of making: social, aesthetic, gendered, and sacred. Each chapter examines how Pre-Raphaelitism takes up and explores modes of making and re-making identity, relationality, moral transformations, and even, time and space. Essays explore themes of formalist or prosodic approaches, expanded networks of literary and artistic influence within Pre-Raphaelitism, and critical legacies and responses to Pre-Raphaelite poetry and arts, codifying the methods, forms, and commonalities that constitute literary Pre-Raphaelitism.

A History of English Romanticism in the Eighteenth Century - Henry Augustin Beers 1898

IRS Humbug - Frank Kowalik 1991

IRS HUMBUG--Reveals illegal force used by U. S. Government employees to perpetuate existing false beliefs about what is commonly known as income tax. A tax on income received in exchange for labor is a direct tax that requires apportionment to remain in harmony with the U. S. Constitution. Federal income tax is not such a tax. It is not a tax at all, but a kickback program accepted by anyone who chooses to become effectively connected with the U. S. Government as their employee. This book covers its origin, history, limited applicability, how it is currently being implemented upon persons who are not employees of the U. S. Government, & remedy. Undue influence used by U. S. government employees coerce persons into creating & discharging a personal debt upon a U. S. Individual Income Tax Return results in a condition of involuntary servitude, specifically peonage, prohibited by civil rights laws & the U. S. Constitution. The author learned these truths through study of laws, the U. S. Constitution, & the Internal Revenue Code; which are cited. Illegal incarceration, supposedly for willful failure to file income tax returns, completed his education. This experience & knowledge is shared along with ideas on exercising personal sovereignty over one's life, liberty & property.

International Protection of Adults - Richard Frimston 2015-01-22

Increasing numbers of people have connections with one country, but live and work in another, frequently owning property or investments in several countries. People with lifelong or subsequently developed impairments of capacity move cross-border or have property or family interests or connections spread across different jurisdictions. This new work fills a gap in a specialist market for a detailed work advising lawyers on all the considerations in these situations. The book provides a clear, comprehensive, and unique overview of all relevant capacity and private international law issues, and the existing solutions in common law and civil law jurisdictions and under Hague Convention XXXV. It sets out the existing law of various important jurisdictions, including detailed chapters on the constituent parts of the UK, Ireland, Jersey, the Isle of Man and the Hague 35 states; and shorter chapters on 26 Non-Hague states and those within federal states, including coverage of the United States, several Australian and Canadian states, and a number of other Commonwealth jurisdictions. Containing a number of helpful case studies and flowcharts, the book draws upon the expertise of the editors in their respective fields, together with detailed contributions from expert practitioners and academics from each relevant jurisdiction. All the editors and many of the contributors and correspondents are members of STEP.
