**Archaeologists in Print** - Amara Thornton 2018-06-25

Archaeologists in Print is a history of popular publishing in archaeology in the nineteenth and twentieth centuries, a pivotal period of expansion and development in both archaeology and publishing. It examines how British archaeologists produced books and popular periodical articles for a non-scholarly audience, and explores the rise in archaeologists' public visibility. Notably, it analyses women's experiences in archaeology alongside better known male contemporaries as shown in their books and archives. In the background of this narrative is the history of Britain's imperial expansion and contraction, and the evolution of modern tourism in the Eastern Mediterranean and Middle East. Archaeologists exploited these factors to gain public and financial support and interest, and build and maintain a reading public for their work, supported by the seasonal nature of excavation and tourism. Reinforcing these publishing activities through personal appearances in the lecture hall, exhibition space and site tour, and in new media - film, radio and television - archaeologists shaped public understanding of archaeology. It was

spadework, scripted. The image of the archaeologist as adventurous explorer of foreign lands, part spy, part foreigner, eternally alluring, solidified during this period. That legacy continues, undimmed, today. Praise for Archaeologists in Print This beautifully written book will be valued by all kinds of readers: you don't need to be an archaeologist to enjoy the contents, which take you through different publishing histories of archaeological texts and the authors who wrote them. From the productive partnership of travel guide with archaeological interest, to the women who feature so often in the history of archaeological publishing, via closer analysis of the impact of John Murray, Macmillan and Co, and Penguin, this volume excavates layers of fascinating facts that reveal much of the wider culture of the late nineteenth and twentieth centuries. The prose is clear and the stories compulsive: Thornton brings to life a cast of people whose passion for their profession lives again in these pages. Warning: the final chapter, on Archaeological Fictions, will fill your to-be-read list with stacks of new titles to investigate! This is a highly readable, accessible exploration into the dynamic relationships between academic authors, publishers, and readers. It is, in addition, an exemplar of how academic research can attract a wide general readership, as well as a more specialised one: a stellar combination of rigorous scholarship with lucid, pacy prose. Highly recommended!' *The Selvage* - Linda Gregerson 2012-10-23  
A magnificent new collection from National Book Award finalist and Kingsley Tufts Award winner Linda Gregerson In eloquent poems about Ariadne, Theseus, and Dido, the death of a father, a bombing raid in Lebanon, and in a magnificent series detailing Masaccio's Brancacci frescoes, *The Selvage* deftly traces the "line between" the "wonder and woe" of human experience. Keenly attuned to the precariousness of our existence in a fractured world—of "how little the world will spare us"—Gregerson explores the cruelty of human and political violence, such as the recent island massacre in Norway and "the current nightmare" of war and terrorism. And yet, running as a "counterpoint" to violence and cruelty is "The reigning brilliance / of the genome and / the risen moon . . .," "The / arachnid's exoskeleton. The kestrel's eye." *The Selvage* is the boldest evidence yet that Linda Gregerson's unique combination of dramatic lyricism and fierce intelligence transcends current fashions to claim an enduring place in American poetry.
