A General Catalog of HI Observations of Galaxies - W.K. Huchtmeier 2013-03-09

A catalog of all published HI observations of external galaxies has been compiled. Its construction is briefly described. It contains almost 20,000 entries for over 10,000 galaxies based on more than 570 references. Here the reference catalog is presented. It contains the HI data basically just as they were originally published. No numerical conversions were made and no error correction was attempted. Contents Summary

A Marine Boundary Layer Sampling Flight

in Clear Air - Donald J. Varley 1979
The AFGL-instrumented MC-130E aircraft made
several 8-min particle-sampling passes off the
San Francisco coast on 10 July 1978 at levels
from 100 to 1000 ft altitude. Spectrometers
capable of recording particles from 2 to 6400
micrometers were used, but in the existing
cloudless conditions only particles between 2
and 30 micrometers were detected. These were
recorded by the PMS axial scattering
spectrometer probe.
