THE ANALYSIS OF CYBER SECURITY THE EXTENDED CARTESIAN METHOD APPROACH WITH INNOVATIVE STUDY MODELS - Diego ABBO 2019-04-01

Cyber security is the practice of protecting systems, networks, and programs from digital attacks. These cyber attacks are usually aimed at accessing, changing, or destroying sensitive information; extorting money from users; or interrupting normal business processes. Implementing effective cyber security measures is particularly challenging today because there are more devices than people, and attackers are becoming more innovative. This thesis addresses the individuation of the appropriate scientific tools in order to create a methodology and a set of models for establishing the suitable metrics

and pertinent analytical capacity in the cyber dimension for social applications. The current state of the art of cyber security is exemplified by some specific characteristics.

The Routledge Companion to Accounting Education - Richard M.S. Wilson 2014-04-29

Many enquiries into the state of accounting education/training, undertaken in several countries over the past 40 years, have warned that it must change if it is to be made more relevant to students, to the accounting profession, and to stakeholders in the wider community. This book's over-riding aim is to provide a comprehensive and authoritative source of reference which defines the domain of accounting education/training, and which provides a critical overview of the state of this domain (including emerging and cutting edge issues) as a foundation for facilitating improved accounting education/training scholarship and research in order to enhance the educational base of accounting practice. The Routledge Companion to Accounting Education highlights the key drivers of change - whether in the field of practice on the one hand (e.g. increased regulation, globalisation, risk, and complexity), or from developments in the academy on the other (e.g. pressures to embed technology within the classroom, or to meet accreditation criteria) on the other. Thirty chapters, written by leading scholars from around the world, are grouped into seven themed sections which focus on different facets of their respective themes - including student, curriculum, pedagogic, and assessment considerations.

Principles of Geology - Sir Charles Lyell 1842

Management Accounting - Professor Carsten Berkau 2020-04-20
Management Accounting is written for students in international Business Management study programs. It covers the widely applied syllabus of Cost Accounting and Management Accounting at universities on bachelor's and master's level. The book is based on more than 20 years' academic teaching experience in Germany and at international universities in South Africa, Malaysia, China, the Netherlands and South Korea. In this text book, the application of methods and instruments comes first. Management Accounting follows a case study based approach. All cases are taken from previous exam papers and explained in detail. The text book starts with a case study of a manufacturing company and compares Financial Accounting to Management Accounting. It covers two point of views: (1) a General Management view, with aspects of business planning, cost-volume-profit analysis, degree of operating leverage, mergers and cross-border acquisitions and risk valuation. (2) a Cost Accounting view with Management Accounting systems, flexible budgeting, cost allocations, performance measurement and monitoring, reporting, calculation, manufacturing accounting (job order and process costing), activity based costing and multi-level contribution margin Accounting. On the UVK website, numerous exam tasks and complete solutions thereto are available in English.
