Proceedings of the RILEM International Symposium on Bituminous Materials - Hervé Di Benedetto 2021-09-25

This volume highlights the latest advances, innovations, and applications in bituminous materials and structures and asphalt pavement technology, as presented by leading international researchers and engineers at the RILEM International Symposium on Bituminous Materials (ISBM), held in Lyon, France on December 14-16, 2020. The symposium represents a joint effort of three RILEM Technical Committees from Cluster F: 264-RAP "Asphalt Pavement Recycling", 272-PIM "Phase and Interphase Behaviour of Bituminous Materials", and 278-CHA "Crack-Healing of Asphalt Pavement Materials". It covers a diverse range of topics concerning bituminous materials (bitumen, mastics, mixtures) and road, railway and airport pavement structures, including: recycling, phase and interphase behaviour, cracking and healing, modification and innovative materials, durability and environmental aspects, testing and modelling, multi-scale properties, surface characteristics, structure performance, modelling and design, non-destructive testing, back-analysis, and Life Cycle Assessment. The contributions, which were selected by means of a rigorous international peer-review process, present a wealth of exciting ideas that will open novel research directions and foster new multidisciplinary collaborations.

The Report: Myanmar 2018 - 2018

Although recent GDP growth has moderated from the double-digit highs of the early 2000s, it has remained above 5% for more than 25 years, supported by robust natural resource exports, steady foreign direct investment (FDI), rising incomes and private consumption, and rapid expansion of the industrial and services sectors. External headwinds and internal conflict have dampened the near-term outlook; however, the country's long-term economic outlook remains positive, with rising investment in transport and power infrastructure expected to drive GDP and industrial growth, supported by a sharp increase in personal incomes and consumer spending.

Active Protective Coatings - Anthony E. Hughes 2016-03-01

This book covers a broad range of materials science that has been brought to bear on providing solutions to the challenges of developing self-healing and protective coatings for a range of metals. The book has a strong emphasis on characterisation techniques, particularly new techniques that are beginning to be used in the coatings area. It features many contributions written by experts from various industrial sectors which examine the needs of the sectors and the state of the art. The development of self-healing and protective coatings has been an expanding field in recent years and applies a lot of new knowledge gained from other fields as well as other areas of materials science to the development of coatings. It has borrowed from fields such as the food and pharmaceutical industries who have used, polymer techniques, sol-gel science and colloidosome technology for a range encapsulation techniques. It has also borrowed from fields like hydrogen storage such as from the development of hierarchical and other materials based on organic templating as "nanocontainers" for the delivery of inhibitors. In materials science, recent developments in high throughput and other characterisation techniques, such as those available from synchrotrons, are being increasingly used for novel characterisation - one only needs to look at the application of these techniques in self healing polymers to gauge wealth of new information that has been gained from these techniques. This work is largely driven by the need to replace

environmental pollutants and hazardous chemicals that represent risk to humans such as chromate inhibitors which are still used in some applications.

A Practical Guide for Policy Analysis - Eugene Bardach 2015-08-19

In the Fifth Edition of *A Practical Guide for Policy Analysis: The Eightfold Path to More Effective Problem Solving*, Eugene Bardach and new co-author Eric Patashnik draw on more than 40 years of experience teaching students to be effective, accurate, and persuasive policy analysts. This bestselling handbook presents dozens of concrete tips, interesting case studies, and step-by-step strategies that are easily applicable for the budding analyst as well as the seasoned professional. In this new edition, Bardach and Patashnik update many examples to reflect the shifting landscape of policy issues. A new section with advice on how to undertake policy design in addition to making policy choices makes the book even more engaging. Readers will also appreciate a sample document of real world policy analysis, suggestions for developing creative, "out-of-the-box" solutions, and tips for working with clients.

Confronting Corruption - Jeremy Pope 2000

The first version of this Source Book argued the case for a "National Integrity System", an holistic approach to transparency and accountability and embracing a range of accountability "pillars", democratic, judicial, media and civil society. The expression has since passed into common usage in development circles, and the argument for an holistic approach to anti-corruption efforts has similarly achieved a widespread consensus. The fight against corruption is not wholly a moral one, in the sense that it is a struggle against the intrinsic "evil" of corruption. Certainly there is a moral element - and one which cuts across all major religions and societies throughout the world. But the compelling reason for the struggle is the suffering and deprivation corruption brings to whole societies, and to the world's most poor. It is concern for the latter, rather than a distaste for the corrupt and their deeds, that rightly drives the global movement against corruption.

The Business Year: Mozambique 2020/21 - 2021-01-29

This 144-page publication aims to provide a platform for the country's decision makers at a time of global uncertainty and act as a guide for investors looking seriously at the African economy. It covers finance, energy, mining, industry, IT and telecoms, transport and logistics, construction, real estate, agro industry, health, education, and tourism.

World Energy Outlook 2008 - International Energy Agency 2008

"World Energy Outlook 2008 draws on the experience of another turbulent year in energy markets to provide new energy projections to 2030, region by region and fuel by fuel, incorporating the latest data and policies."

World Energy Outlook 2009 - Organisation for Economic Co-operation and Development 2009

World Energy Outlook presents the International Energy Agency's authoritative annual global energy projections. This 2009 edition analyzes what the economic crisis will mean for energy markets and how the transition to a clean global energy system can be financed. It focuses on three specific areas: financing energy investment under a post 2012 climate framework, prospects for natural gas markets, and energy trends in Southeast Asia.

Modification of Polymers - Charles E. Carraher 2012-12-06

The sheer volume of topics which could have been included under our general title prompted us to make some rather arbitrary decisions about

content. Modification by irradiation is not included because the activity in this area is being treated elsewhere. We have chosen to emphasize chemical routes to modification and have striven to present as balanced a representation of current activity as time and page count permit. Industrial applications, both real and potential, are included. Where appropriate, we have encouraged the contributors to include review material to help provide the reader with adequate context. The initial chapter is a review from a historical perspective of polymer modification and contains an extensive bibliography. The remainder of the book is divided into four general areas: Reactions and Preparation of Copolymers Reactions and Preparation of Block and Graft Copolymers Modification Through Condensation Reactions Applications The chemical modification of homopolymers such as polyvinylchloride, polyethylene, poly(chloroalkylene sulfides), polysulfones, poly chloromethylstyrene, polyisobutylene, polysodium acrylate, polyvinyl alcohol, polyvinyl chloroformate, sulfonated polystyrene; block and graft copolymers such as poly(styrene-block-ethylene-co-butylene block-styrene), poly(I,4-polybutadiene-block ethylene oxide), star chlorine-telechelic polyisobutylene, poly(isobutylene-co-2,3-dimethyl-1,3-butadiene), poly(styrene-co-N-butylmethacrylate); cellulose, dextran and inulin, is described.

The Energy Year Mozambique 2020 - The Energy Year 2020-09-25

"Following the discovery of natural resources, Mozambique has a unique opportunity to achieve its objectives that focus on social development and infrastructure development, as well as to overcome its dependence on foreign donor aid." Estêvão Pale, CEO and Chairman, ENH The Energy Year Mozambique 2020 arrives at a crucial moment. With the country's energy industry stimulated by the signing of a USD 20-billion FID for the Mozambique LNG project, the recent acquisition of 3D PSDM seismic data, preparations for a sixth bidding round and governmental approval of key power projects, Mozambique is on the verge of an energy revolution that will foster economic and social sustainability.

"Considering the resource base of the country in areas 1 and 4, we do expect to see additional FIDs." Carlos Zacarias, President of the National Petroleum Institute (INP) The Energy Year Mozambique 2020 also highlights the key role of Electricidade de Moçambique (EDM) in strengthening domestic and regional electricity supply under the nationwide ProEnergia initiative. Produced in partnership with ENH and INP, this third edition of The Energy Year's (formerly TOGY) Mozambique series provides insight to investors and companies looking at strategic opportunities in the country as it gears up ahead of first gas production in 2022.

Ethical Challenges in Global Public Health - Philip J. Landrigan 2021-08-05

The Global Theological Ethics book series focuses on works that feature authors from around the world, draw on resources from the traditions of Catholic Theological Ethics, and attend to concrete issues facing the world today.

Unsustainable World - Peter N. Nemetz 2022-02-28

Using a cross-disciplinary, science- and economics-based approach, this book provides a sobering and comprehensive assessment of the multifaceted barriers to achieving sustainability at a global level. Organized into three parts, the book defines sustainability in part I and sets the context of the historical and current difficulties facing the world today. In parts II and III, it outlines the sustainability challenges faced in transportation, manufacturing, and agriculture, and then in turn addresses the solutions, conditional solutions, and nonsolutions to these challenges. These include electric and autonomous automobiles, nuclear power, renewable energy, geoengineering, and carbon capture and storage. The author attempts to differentiate among those proposed solutions and discusses which are most promising and which are infeasible, counterproductive, and potentially a waste of time and money. In each of the book's chapters, the scientific evidence is presented in detail, in keeping with the advice of the young Swedish climate activist, Greta Thunberg, to let the science speak for itself. The author outlines why sustainability is unlikely to be achieved in several key areas of human endeavor and readers are challenged to weigh the scientific evidence for themselves. Using an economic business-based approach, this book introduces students and general readers to the challenges of sustainability and the environmental difficulties facing humanity today.

Fundamentals of Heat and Mass Transfer - T. L. Bergman 2011-04-12 Completely updated, the seventh edition provides engineers with an in-depth look at the key concepts in the field. It incorporates new discussions on emerging areas of heat transfer, discussing technologies that are related to nanotechnology, biomedical engineering and

alternative energy. The example problems are also updated to better show how to apply the material. And as engineers follow the rigorous and systematic problem-solving methodology, they'll gain an appreciation for the richness and beauty of the discipline.

Energy Markets in Emerging Economies - Henry K. H. Wang 2016-07-15

Energy Markets in Emerging Economies addresses current key issues, new opportunities, and various growth strategies relating to the energy markets in key emerging economies. The book addresses key aspects, including key oil and gas energy markets, and their strategic ties to global petrochemical and chemicals, shale gas, and renewable energy growths. It also provides insights on business strategies and market expansion strategies employed by MNCs and state-owned companies in maintaining and defending their positions in the global market, and in developing new markets and opportunities globally, particularly in China, India and the Middle East. The strategic implications of the global oil and gas prices fluctuations on the industries are also discussed. The practical and theoretical perspectives within the commercial context addressed in this book provide a clearer understanding of the energy markets and their leading players, relevant not only to industry players, but also interdependent markets.

The Fist of God - Frederick Forsyth 2015-03-18

From the bestselling author of *The Day of the Jackal*, international master of intrigue Frederick Forsyth, comes a thriller that brilliantly blends fact with fiction for one of this summer's—or any season's—most explosive reads! From the behind-the-scenes decision-making of the Allies to the secret meetings of Saddam Hussein's war cabinet, from the brave American fliers running their dangerous missions over Iraq to the heroic young spy planted deep in the heart of Baghdad, Forsyth's incomparable storytelling skill keeps the suspense at a breakneck pace. Somewhere in Baghdad is the mysterious "Jericho," the traitor who is willing—for a price—to reveal what is going on in the high councils of the Iraqi dictator. But Saddam's ultimate weapon has been kept secret even from his most trusted advisers, and the nightmare scenario that haunts General Schwarzkopf and his colleagues is suddenly imminent, unless somehow, the spy can locate that weapon—*The Fist of God*—in time. Peopled with vivid characters, brilliantly displaying Forsyth's incomparable knowledge of intelligence operations and tradecraft, moving back and forth between Washington and London, Baghdad and Kuwait, desert vastnesses and city bazaars, this breathtaking novel is an utterly convincing story of what may actually have happened behind the headlines.

Highway Engineering - Athanassios Nikolaidis 2014-11-24

An International Textbook, from A to Z Highway Engineering: Pavements, Materials and Control of Quality covers the basic principles of pavement management, highlights recent advancements, and details the latest industry standards and techniques in the global market. Accelerated Pavement Testing to Transport Infrastructure Innovation - Armelle Chabot 2020-08-25

This volume gathers the latest advances, innovations, and applications in the field of accelerated pavement testing (APT), presented at the 6th International Conference on Accelerated Pavement Testing, in Nantes, France, in April 2022. Discussing APT, which involves rapid testing of full-scale pavement constructions for structural deterioration, the book covers topics such as APT facilities, APT of asphalt concrete and sustainable/innovative materials, APT for airfield pavements, testing of maintenance and rehabilitation solutions, testing of smart and multi-functional pavements, data analysis and modeling, monitoring and non-destructive testing, and efficient means of calibrating/developing pavement design methods. Featuring peer-reviewed contributions by leading international researchers and engineers, the book is a timely and highly relevant resource for materials scientists and engineers interested in determining the performance of pavement structures during their service life (10+ years) in a few weeks or months.

Sustainability Strategies - R. Orsato 2016-01-13

By analysing the rationales for sustainability strategies, this book addresses a timely question for managers, academics and MBAs: 'when

does it pay to be green?' Based on solid theoretical foundations and empirical research, it clarifies the elements involved in the formation and evaluation of sustainability strategies in firms.

The Report: Papua New Guinea 2016 - Oxford Business Group
2016-09-19

In terms of investment, Papua New Guinea's geographic location, geopolitical importance and abundance of commodities, as well as the success of the PNG Liquefied Natural Gas project, have helped it become a favoured destination for Chinese and Japanese ventures, with expectations of further foreign direct investment (FDI) going forward, particularly in the primary sector. However, PNG remains a challenging place for international participants, and while high-level, strategically important projects are likely to proceed smoothly, smaller, more entrepreneurial ventures may face difficulty. To improve this reputation the country is trying to boost transparency and efficiency in business transactions, though new initiatives under way could see it adopt more protectionist policies, thereby going against the tenets of liberal economics it has traditionally embraced.

Sustainable Logistics and Supply Chain Management (Revised Edition) - David B. Grant 2015-03-03

Sustainable Logistics and Supply Chain Management is the essential guide to the principles and practices of sustainable logistics operations and the responsible management of the entire supply chain. Based on extensive research by experts in the field, this comprehensive book covers the whole scope of sustainable logistics. The book provides carefully reviewed research-led applications and case studies that have been especially developed for this revised edition with particular attention for use in a teaching context. The mini case studies are highly topical, relating the theoretical concepts to practice and what is actually happening 'on the ground'. Examining the subject in an integrated manner, this book examines all the key areas in sustainable logistics and supply chain management, including: sustainable product design and packaging; sustainable purchasing and procurement; cleaner production; environmental impact of freight transport; sustainable warehousing and storage; sustainable supply management; reverse logistics and recycling; supply chain management strategy, and much more. The book provides an excellent insight into the topic that will help managers, students, and scholars grasp the fundamentals of green supply and logistics management. This revised edition of Sustainable Logistics and Supply Chain Management includes valuable supporting online materials, including PPT presentations, chapter summaries, learning objectives, tips for teaching and in class activities.

Sustainable Construction Materials - Ravindra K. Dhir OBE
2017-10-18

Sustainable Construction Materials: Municipal Incinerated Bottom Ash discusses the global use of virgin aggregates and CO2 polluter Portland cement. Given the global sustainability agenda, much of the demand for these two sets of materials can be substantially reduced through the appropriate use of waste materials, thereby conserving natural resources, energy and CO2 emissions. Realistically, this change can only be realized and sustained through engineering ingenuity and new concepts in design. Although a great deal of research has been published over the last 50 years, it remains fragmented and ineffective. This book develops a single global knowledge-base, encouraging greater use of selected waste streams. The focus of massive systematic reviews is to encourage the uptake of recycled secondary materials (RSM) by the construction industry and guide researchers to recognize what is already known regarding waste. Provides an extensive source of valuable database information, supported by an exhaustive list of globally-based published literature over the last 40-50 years Offer an analysis, evaluation, repackaging and modeling of existing knowledge on sustainable construction practices Provides a wealth of knowledge for use in many sectors relating to the construction profession

8th RILEM International Symposium on Testing and Characterization of Sustainable and Innovative Bituminous Materials - Francesco Canestrari 2015-09-24

This work presents the results of RILEM TC 237-SIB (Testing and characterization of sustainable innovative bituminous materials and systems). The papers have been selected for publication after a rigorous peer review process and will be an invaluable source to outline and clarify the main directions of present and future research and standardization for bituminous materials and pavements. The following topics are covered: - Characterization of binder-aggregate interaction - Innovative testing of bituminous binders, additives and modifiers - Durability and aging of asphalt pavements - Mixture design and compaction analysis - Environmentally sustainable materials and technologies - Advances in laboratory characterization of bituminous materials - Modeling of road materials and pavement performance prediction - Field measurement and in-situ characterization - Innovative materials for reinforcement and interlayer systems - Cracking and damage characterization of asphalt pavements - Recycling and re-use in road pavements This is the proceedings of the RILEM SIB2015 Symposium (Ancona, Italy, October 7-9, 2015).
