Shuters Top Class Geography - Pieter Esterhuysen 2012

**Communities in Action** - National Academies of Sciences, Engineering, and Medicine 2017-04-27

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and

structural barriers that need to be overcome. Teaching and Learning Geography - Daniella Tilbury 2002-11

Geographies of Schooling - Holger Jahnke  
2019-08-21

This open access book explores the complex relationship between schooling as a set of practices embedded in educational institutions and their specific spatial dimensions from different disciplinary perspectives. It presents innovative empirical and conceptual research by international scholars from the fields of social geography, pedagogy, educational and social sciences in Germany, the United Kingdom, France, Czechia, Hungary, Austria, Switzerland, Norway and Canada. The book covers a broad range of topics, all examined from a spatial perspective: the governance of schooling, the transition processes of and within national school systems, the question of small schools in peripheral areas as well as the embeddedness of schooling in broader processes of social change. Transcending disciplinary boundaries, the book offers deep insights into current theoretical debates and empirical case studies within the broad research field encompassing the complex relationship between education and space.

**Children, Education and Geography** - Lauren Hammond 2022-11-30

This book examines the intersections between children, education and geography. With a particular focus on children's geographies and geographies of education, the book draws upon cutting-edge research to consider how geographical education can be enhanced through increased engagement with these fields. The book is underpinned by the position that the lives of children and young people are inherently geographical, as are educational institutions, systems and processes. The volume explores the ways in which the diverse relationships between children, education and geography can enrich research and work with, and for, children and young people. Chapters in this book consider

how in/justices are (re)produced through education. Chapters also explore how insights generated by thinking in, and across, geography and education can be used to support and empower young people in both formal education and in their everyday lives. Ultimately, this book is written for children and young people. Not as the readership, but as people, often marginalised in decision making at a variety of scales in education, and who, we contend should be at the heart of all educational thinking. The book is of value to undergraduate and post graduate students interested in geography education and children's geographies, as well as teachers of geography, both new and experienced.

*Didactic Strategies and Resources for Innovative Geography Teaching* - García de la Vega, Alfonso 2022-06-10

Education has undergone a series of changes based on the new technologies, strategies, and best practices that have been developed in recent years. Specifically, the way various subjects are taught has developed considerably as education turns toward a more digital approach. Geography education is no different and has had to adjust to these innovative practices in order to provide students with the best possible curricula. *Didactic Strategies and Resources for Innovative Geography Teaching* presents educational strategies and resources to promote cross-disciplinary approaches to teaching geographic knowledge and skills. The book also discusses how geography education boosts essential cognitive and attitudinal

processes in personal development, fosters critical thinking, and builds a society committed to its environment. Covering key topics such as mobile learning, natural learning environments, and geographic information systems, this reference work is ideal for teachers, geographers, researchers, scholars, academicians, practitioners, instructors, and students.

**Evolutions of the Complex Relationship Between Education and Territories** - Angela Barthes 2018-03-15

The book weaves the story of the complex links between education and its territories. The aim here is to examine the education couple - understood in the broadest sense: school, college, high school, universities - and territory, according to three main axes: the history and the characterization of the different ties maintained And which the school and its territory always maintain; That of the categorization and characterization of the territories in which the school is situated, of the educational policies - both explicit and grassroots - connected with it and their effects on the school; That of recent pedagogical, didactic and organizational innovations. The book is based on French specialists in territorial education issues.

Geospatial Technologies and Geography Education in a Changing World - Osvaldo Muñoz Solari 2015-08-31

This book is an initiative presented by the Commission on Geographical Education of the International Geographical Union. It focuses particularly on what has been learned from geospatial projects and research from the past decades of implementing geospatial technologies (GST) in formal and informal education. The objective of this publication is to inform an international audience of teachers, professionals, scholars, and policymakers about the state of the art and prospects of geospatial practices (GPs) as organized activities that use GST and lessons learned in relation to geographical education. GST make up an advanced body of knowledge developed by practitioners of geographic information systems (GIS), remote sensing (RS), global positioning systems, (GPS), and digital cartography (DC). GST have long been applied in many different sectors; however, their first use in higher education began in the early 1980s and then diffused to secondary schools during the 1990s. Starting with GIS and RS, it evolved into a much broader context, as GST expanded to include GPS and DC with new communication technologies and Internet applications. GST have been used around the world as a combination of tools and special techniques to make research, teaching, and learning more effective.

Study and Master Geography Grade 11 CAPS Study Guide - Helen Collett 2014-08-21

*Global Perspectives on Issues and Solutions in Urban Education* - Petra A. Robinson 2019-03-01  
In 2014, The Urban Education Collaborative at the University of North Carolina at Charlotte

hosted its first biennial International Conference on Urban Education (ICUE) in Montego Bay, Jamaica. In 2016, the second hosting of the conference took place in San Juan, Puerto Rico. Additionally, in 2018, the third hosting of the conference took place in Nassau, Bahamas. These solution-focused conferences brought together students, teachers, scholars, public sector and business professionals as well as others from around the world to present their research and best practices on various topics pertaining to urban education. With ICUE's inspiration, this book is a response to the growing need to highlight the multifaceted aspects of urban education particularly focusing on common issues and solutions in urban environments (e.g., family and community engagement, student academic achievement, teacher preparation and professional development, targeted instructional and disciplinary interventions, opportunity gaps, culturally-relevant and sustaining practices, etc.). Additionally, with this book, we seek to better understand the challenges facing urban educators and students and to offer progressive initiatives toward resolutions. This unique compilation of work is organized under four major themes all targeted at critically addressing concerns that may inhibit the success of urban learners and providing solutions that have implications for curriculum design, development, and delivery; teacher preparation and teaching diverse populations; career readiness and employment; and even more nuanced issues related to foster care, undocumented students and mental health, sustainable consumption, childhood marriage, food deserts, and marine life and urban communities.

*Social Studies for Secondary Schools* - Alan J. Singer 2008-10-26

This popular text advocates an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers. Based in practice and experience, it offers systematic support and open, honest advice for new teachers, is conversational not pedantic, and provides lots of examples. While the structure and most of the topics remain largely the same as before, this Third Edition presents new lesson ideas in every chapter

especially designed to help new teachers to address learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms puts a heavier focus on what is important to know and why includes new essays on the politics of social studies education responds to opponents of project- or activity-based social studies instruction and multicultural education with a sharpened defense of both of these approaches throughout the book Intended as a text for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice.

**Creating Stellar Lessons with Digital Tools** -

Kenneth J. Luterbach 2022-05-13

*Creating Stellar Lessons with Digital Tools* prepares teachers in training and in-service teachers to use technologies for design and development activities with middle and high school students. While software, open resources, handheld devices, and other tools hold great potential to enhance learning experiences, teachers themselves must model technology use in ways that inspire students to become producers and leaders rather than consumers and followers. Featuring concrete applications in social studies, English, mathematics, and science scenarios, this book provides pre-service teachers with seven paths to creatively integrate and innovate with computational thinking, datasets, maker spaces, visual design, media editing, and other approaches.

*Evaluating the Local Impacts of the Rio Olympics* - Marcelo Neri 2020-07-03

This book evaluates the local impacts and legacies of the Olympics in Rio by comparing Rio2016 with other Olympic experiences and evaluating the ways in which the Games served the city. The 2016 Rio Olympic Games took place in a scenario of enormous economic challenges and persistent inequalities. In contrast to all previous Olympic experiences, Brazil faced its worst economic recession ever recorded during the preparation phase for the Games. In addition to the national crisis, falling oil prices and corruption scandals fuelled the State of Rio's economic downfall. This book specifically assesses the relative social performance of Rio's city population with respect to control groups;

covers traditional aspects of the Games' legacy such as tourism, infrastructure and sports practice; includes ordinary day-by-day aspects of the city's life, such as education, employment and housing; and scrutinizes critical areas such as urban mobility, gentrification and Guanabara Bay's pollution. This thorough analysis offers readers further understanding on assessing the impacts and legacies of the Olympic experience. It will be of great interest to upper-level students and academics of tourism, hospitality and events management.

**A Guide to Ontario School Law** - Benjamin Kutsyuruba 2014-05

A Guide to Ontario School Law is a comprehensive, non-partisan, fair-reading of provincial educational statutes, regulations, and relevant policies that will be a first-aid and reference to the lay reader. Our goal is to provide an up-to-date, accessible, and user-friendly guide to various legal parameters for teachers, aspiring teachers, trustees, school administrators, central office administration, parents and interested community members. In particular, the resources and insights in this guide are aimed at helping teacher candidates to develop literacy in educational law and policy and, ultimately, to successfully transition from teacher education programs into teaching careers.

**Perspectives of Black Histories in Schools** - LaGarrett J. King 2019-11-01

Concerned scholars and educators, since the early 20th century, have asked questions regarding the viability of Black history in k-12 schools. Over the years, we have seen k-12 Black history expand as an academic subject, which has altered research questions that deviate from whether Black history is important to know to what type of Black history knowledge and pedagogies should be cultivated in classrooms in order to present a more holistic understanding of the group's historical significance. Research around this subject has been stagnated, typically focusing on the

subject's tokenism and problematic status within education. We know little of the state of k-12 Black history education and the different perspectives that Black history encompasses. The book, *Perspectives on Black Histories in Schools*, brings together a diverse group of scholars who discuss how k-12 Black history is understood in education. The book's chapters focus on the question, what is Black history, and explores that inquiry through various mediums including its foundation, curriculum, pedagogy, policy, and psychology. The book provides researchers, teacher educators, and historians an examination into how much k-12 Black history has come and yet how long it still needed to go.
