Strength and Conditioning for Female

Athletes - Keith Barker 2018-07-27

Women's sport in general has gained an increasingly higher profile and level of respect in recent years, and it is becoming widely acknowledged that a female athlete's training programmes will differ in several respects from that of their male counterparts. Despite this, there is a dearth of research evidence available to coaches and athletes to guide the planning and programming process, with limited comparisons of training adaptations between the genders and in particular, a lack of investigation into elite female performers. Strength and Conditioning for Female Athletes contains insights from various experts in this specialised

area. This text outlines specifically what is and what isn't known regarding female athlete development, and exposes the gaps that currently exist in the academic literature, with practical examples of applied practice. Coaches, sports scientists and athletes themselves will find here a wealth of useful information, with topics including: needs analysis; programme design for the basic biomotor abilities; speed and agility; long-term athlete development; the menstrual cycle and gender-specific injuries.

Regenerative Strategies for Maxillary and Mandibular Reconstruction - James C.

Melville 2019-03-25

This book is designed as a comprehensive and up-to-date instructional guide to the strategies employed for regeneration of the maxillomandibular region, with emphasis on allogeneic and tissue engineering principles. Readers will find information on indications and contraindications for procedures, pertinent anatomy, surgical techniques, postoperative

management, and management of complications. Current surgical techniques utilizing biotechnology for regeneration and reconstruction are described in depth, with explanation of their benefits in minimizing patient morbidity. In addition, state of the art free vascular transfer for maxillary and mandibular reconstruction is extensively discussed, with a particular focus on indications and step-by-step technique. The authors are well-known experts in their field who are keen to share their extensive experience and preferred approaches. The book is intended for all oral and maxillofacial surgeons, head and neck surgeons, and plastic and reconstruction surgeons who wish to increase their knowledge on the latest modalities of maxillary and mandibular reconstruction.

From #BlackLivesMatter to Black Liberation - Keeanga-Yamahtta Taylor 2016-02-01

The author of Race for Profit carries out “[a] searching examination of the social, political and

economic dimensions of the prevailing racial order” (Michelle Alexander, author of *The New Jim Crow*). In this winner of the Lannan Cultural Freedom Prize for an Especially Notable Book, Keeanga-Yamahtta Taylor “not only exposes the canard of color-blindness but reveals how structural racism and class oppression are joined at the hip” (Robin D. G. Kelley, author of *Freedom Dreams*). The eruption of mass protests in the wake of the police murders of Michael Brown in Ferguson, Missouri, and Eric Garner in New York City have challenged the impunity with which officers of the law carry out violence against black people and punctured the illusion of a post-racial America. The Black Lives Matter movement has awakened a new generation of activists. In this stirring and insightful analysis, activist and scholar Keeanga-Yamahtta Taylor surveys the historical and contemporary ravages of racism and the persistence of structural inequality, such as mass incarceration and black unemployment. In this context, she argues that

this new struggle against police violence holds the potential to reignite a broader push for black liberation. “This brilliant book is the best analysis we have of the #BlackLivesMatter moment of the long struggle for freedom in America. Keeanga-Yamahtta Taylor has emerged as the most sophisticated and courageous radical intellectual of her generation.” —Dr. Cornel West, author of *Race Matters* “A must read for everyone who is serious about the ongoing praxis of freedom.” —Barbara Ransby, author of *Ella Baker and the Black Freedom Movement* “[A] penetrating, vital analysis of race and class at this critical moment in America’s racial history.” —Gary Younge, author of *The Speech: The Story Behind Dr. Martin Luther King Jr.’s Dream*

The Character Gap - Christian B. Miller 2018

We like to think of ourselves, our friends, and

our families as pretty decent people. We may not be saints, but we are basically good, fairly honest, relatively kind, and mostly trustworthy. One of the central themes of 'The Character Gap' is that we are badly mistaken in thinking this way. In recent years, hundreds of psychological studies have been done which tell a rather different story. We have serious character flaws that prevent us from being good people, many of which we do not even recognize in ourselves. Does this mean that instead we are wretched people, vicious, cruel or hateful? Christian Miller does not argue that this is necessarily the case either.

The Story of Guns - Katherine McLean Brevard 2010

When the Chinese invented gunpowder in 850, their explosive invention became the basis for almost every weapon used in war. It radically changed warfare all over the world, affecting the way battles were fought throughout the Middle Ages. When guns were invented five centuries later, the world was again transformed.

Explosive weaponry was available to the individual, creating a new class of soldier and giving birth to the modern army.

Marine Algae - Leonel Pereira 2014-09-26

This book is divided into three thematic areas. The first covers a revision of the taxonomy of algae, based on the algae portal, as well as the general aspects of biology and the methodologies used in this branch of marine biology. The second subject area focuses on the use of algae in environmental assessment, with an intensive implementation in Western economies and some emerging economies. The third topic is the potential use of algae in various industries including food, pharmaceuticals, cosmetics, agricultural fertilizers, and the emerging biofuels industries.
