<u>Medieval Indian Mindscapes</u> - Eugenia Vanina 2012

Medieval Indian Mindscapes: Space, Time, Society, Man centres on how Indians in precolonial times perceived their world. It compares the specific features of their 'mental programmes' with that of their counterparts in other pre-modern societies. While analysing the importance of space in the medieval world view, the book discusses how medieval Indians comprehended their territories and the landscape as 'their own' vis-a-vis the 'alien' space; the development of territorial-cultural and territorial-political identities, and knowledge about other lands and peoples. In a discussion of medieval temporality, the book also studies the ways of perceiving and reckoning time, attitudes to the historical past and the manifold ways of recording it. A special chapter on 'Society' deals with socio-ethical values and behavioural stereotypes of major estate and caste groups like the feudal landlords, priests and officials, merchants and craftsmen, peasants and the lower castes in villages. The book also has a chapter on the medieval Indian perception of Man, his appearance and peculiarities as they pertained to the age; behaviour, social status, and the steady development of individuality. Medieval Indian Mindscapes will be of interest to medievalists as well as general readers, keen to know more about the dynamics of pre-modern history and culture.

### The Status of Muslim Women in Medieval India - Sudha Sharma 2016-03-21

This book examines the economic, cultural, political and social positions of Muslim women in medieval India. It explores the changes that took place with the advent of Arabs, Turks, Mongols, Tartars, Afghans and Persians whose customs and traditions influenced the existing Islamic society. Though Islam improved the position of women by instituting many reforms, the Islamic religious texts laid down the minutest code of conduct for women, the slightest deviation from which was considered irreligious. Such rigidity, coupled with the apathy of the ulemas, led to the weakening of position of women. The book goes on to show how the diktats of the Quran were

subjected to many interpretations down the ages, affecting the status of women in various ways.

## **Medieval Indian Armies (1)** - David Nicolle 2022-05-26

This fully illustrated study explores the armies of the Hindu, Buddhist and Jain states within what are now India, Pakistan, Bangladesh, Sri Lanka and Nepal during the period AD 500-1500, as well as Afghanistan until the early 13th century AD. Following the emergence of a distinct 'medieval Indian' civilization in the Late Classical and Early Medieval periods, there was a prolonged struggle between this civilization and that of the eastern Islamic world, concluding with the rise of the Mughal Empire at the start of the 16th century. In this fully illustrated study, David Nicolle investigates the traditions and enduring conservatism of non-Islamic medieval Indian warfare, notably evident in recruitment patterns and the significance of archery and cavalry. The role and impact of warelephants, both positive and negative, are also considered, as well as the influence of climate and weather (notably the seasonal monsoon) on warfare in this region. As well as assessing arms and armour - contrasting the advanced technology and high status of Indian weapons (especially swords) with the remarkable lack of metallic armour in the region during this period - the author also explores siege warfare and riverine and naval warfare in South Asia. This book assesses the contributing factors identified by those who have sought to explain why the huge wealth and substantial populations of the traditional non-Islamic Indian states did not prevent their persistent failure in the face of Islamic invasion and conquest.

**Muslim Rule in Medieval India** - Fouzia Farooq Ahmed 2016-09-27

The Delhi Sultanate ruled northern India for over three centuries. The era, marked by the desecration of temples and construction of mosques from temple-rubble, is for many South Asians a lightning rod for debates on communalism, religious identity and inter-faith conflict. Using Persian and Arabic manuscripts, epigraphs and inscriptions, Fouzia Farooq Ahmad demystifies key aspects of governance and religion in this complex and controversial period. Why were small sets of foreign invaders and administrators able to dominate despite the cultural, linguistic and religious divides separating them from the ruled? And to what extent did people comply with the authority of sultans they knew very little about? By focusing for the first time on the relationship between the sultans, the bureaucracy and the ruled Muslim Rule in Medieval India outlines the practical dynamics of medieval Muslim political culture and its reception. This approach shows categorically that sultans did not possess meaningful political authority among the masses, and that their symbols of legitimacy were merely post hoc socio-cultural embellishments. Ahmad's thoroughly researched revisionist account is essential reading for all students and researchers working on the history of South Asia from the medieval period to the present day.

<u>A Comprehensive History of Medieval India</u> -Farooqui Salma Ahmed 2011

Presents a consolidated timeline of medieval India by taking into account the period that marked the end of ancient India, and focusing on the importance of the transitory centuries when Delhi had begun to surface as the new power center, triggering prominent trends in thought and institutions. This book analyzes the nature of social forces, complexity of causation and the interdependence of change and continuity in the light of the crucial transition from ancient to early medieval India, with the emergence of the Delhi Sultanate and the Vijayanagar-Bahmani kingdoms. Proceeding to detail the most effervescent period in Indian history - the era of the great Mughals - the text provides an insight into the ideological-philosophical basis of the

times, focusing on the Sufi and Bhakti movements, and culminates with the rise of the Marathas, the advent of European companies, and the eventual establishment of the British in Bengal. keeping in mind that the history of medieval India has not moved in a linear fashion, and that much of the period saw phases of expansion and realignment of political attributes, this book contributes to a deeper understanding of the much misread period of Indian history with a view that takes into account the resultant interface between the political, social, economic, religious and cultural elements and devotes to this crucial period the attention it deserves.

Medieval India - Irfan Habib 2008 Covers the period, 600 A.D. to 1750 A.D. Querying the Medieval - Ronald Inden 2000-06-08

Indologist Ronald Inden has in the past raised questions about the images of a "traditional" or "medieval" India deployed by colonial scholars and rulers--"Orientalists"--and has also argued that a history of "early medieval" India very different from both the colonial and nationalist accounts could be written. This volume is designed as an important first step towards that goal. The authors look closely at three genres of texts that have been crucial to the representations of precolonial India. All three essays challenge not only colonialist scholarship but the attempts by religious nationalists to identify Hinduism as the essence of national identity in India and Buddhism as the essence of nationality in Sri Lanka.

**Towns and Cities of Medieval India** - Aniruddha Ray 2016-09-13

This much anticipated volume looks at the historical evolution of towns and cities in medieval India from the early thirteenth to the late eighteenth century. The selection is based on the availability of documents. These include the narratives of European travellers in English, French, Italian, Dutch, and German with the exception of Ibn Battuta in mid-fourteenth century and also Middle Bengali literature in case of towns in Bengal. While the coastal towns and cities have been looked at, the interior ones are also described on the basis of the writings of later historians and archaeologists. Care has been taken to explain the rise, growth and the decline of some towns and cities in which the changing courses of rivers had played a crucial role. Attempts have been made to search other factors responsible for such eventualities. The delineation of physical features within the city has been given due emphasis including the different quarters of the city and the manners and customs of the local population with reference to craft production and commercial links. The morphological differences between the cities of eastern and those of the western or northern India have also been described. This is clear from the observations of port towns described here. All these would show that India was one of the most urbanized area in the medieval period before advent of the British.
