This book features more than 95 papers that were presented at the bi-annual Regional Conference on Science, Technology and Social Sciences, RCSTSS 2014, which was organized by Universiti Teknologi MARA Pahang. It covers topics ranging from communications studies, politics, psychology, education, religious studies as well as business and economics. The papers, which have been carefully reviewed, include research conducted by academicians locally, regionally and globally. They detail invaluable insights on the important roles played by the various disciplines in science, technology and social sciences. Coverage includes accounting, art and design, business, communication, economics, education, finance, humanity, information management, marketing, music, religion, social sciences and tourism. Throughout, clear illustrations, figures and diagrams complement the research. The book is a significant point of reference to academicians and students who want to pursue further research in their respective fields. It also serves as a platform to disseminate research findings as a catalyst to bring out positive innovations on the development of the region.

**An International Accounting Practice Set** - Erdener Kaynak 2013-08-27

In An International Accounting Practice Set, the only currently available simulation for international accounting, business and accounting students assume the role of a newly-hired employee in the international accounting department of Karissa Jean's, an international distributor of men's and women's jeans. In this role, the student first participates in the company's training program in international business and accounting, working through the first section of the book. After completing the training program, the student performs as an international accountant in Karissa Jean's international accounting department, moving through the second part of the book. In this fashion, readers have a hands-on opportunity to apply newly acquired knowledge in a realistic business setting. The Karissa Jean's simulation works for both those with some familiarity with this topic and for those with no knowledge of international business or accounting. While the authors have targeted the book to community college students, private business

school students, and undergrad business and accounting students (with at least one course of Principles of Accounting), this simulation also works for recertification training for accountants and for basic training in business (for new employees or to retrain other employees in international business or accounting principles), industry, and government. The simulation is twofold: job training and job simulation. The training manual of An International Accounting Practice Set teaches readers everything they need to complete the simulation. As a Karissa Jean's "accountant," readers will learn firsthand: how to convert foreign currencies to U.S. dollars and vice versa. how to record international sales, purchases, cash payments, and cash receipts in an American company's general ledger and in a foreign marketing subsidiary ledger. how to record adjusting entries for unsettled accounts payable and accounts receivable at the end of the accounting period. how to audit the French marketing subsidiary's ledger and identify and correct any errors. how to translate foreign financial statements from French francs into U.S. dollars. how to perform problem-solving and writing activities, such as translating a Spanish memo into English and preparing an outline for a speech on international accounting. In doing the Karissa Jean's simulation, students begin to apply classroom knowledge in an employment setting. It is an ideal approach for students with no prior knowledge of international business or accounting who wish to pursue that career field. Those who are familiar with accounting will appreciate the "hands on" opportunity to test their knowledge in an international employment setting. All readers will come to better understand international business issues, including balance of trade and balance of payments, international trade organizations like GATT, the World Bank, and cartels. An International Accounting Practice Set explores related issues in international business, such as ways to enter foreign markets, potential obstacles to foreign trade--cultural and language differences, economic conditions, marketing difficulties, fluctuating currency exchange rates, government instability, and trade protectionism--and provides ideas on how to overcome or prevent such obstacles from becoming trade barriers.

*Principles of Accounting Volume 1 - Financial Accounting - Mitchell Franklin* 2019-04-11

The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

*Assessing Carbon Stocks and Modelling Win-win Scenarios of Carbon Sequestration Through Land-use*

*Changes* - Raul Ponce-Hernandez 2004

This publication contains a methodology and software tools for assessing carbon stocks and modelling scenarios of carbon sequestration developed and tested in pilot field studies in Mexico and Cuba. The models and tools enable the analysis of land use change scenarios in order to identify in a given area (watershed or district) land use alternatives and land management practices that can both maximise food production, soil carbon sequestration and biodiversity and minimize land degradation. The aims is to develop and implement "win-win" options that satisfy the multiple goals of farmers, land users and other stakeholders in relation to food security, carbon sequestration, biodiversity and land conservation. The publication also contains a CD-ROM including three case studies and a Soil-C program demo, program and user manual.
