Strengthening Forensic Science in the United States - National Research Council 2009-07-29

Scores of talented and dedicated people serve the forensic science

community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The "People Power" Beauty Guide (Outer Beauty, Inner Beauty, Modesty, Fashion, Cosmetic Surgery, Skincare, Acne, Hair Loss, Cosmetics, Jewelry: The Beauty Business, Beauty Jobs) - Tony Kelbrat 2013-12-05

What is true feminine beauty? As the artist I fancy myself to be, I feel that I know it when I see it. Many women are blessed with natural beauty which has two components as far as I'm concerned: 1.) The face. 2.) The body. In the face, some women have striking looks but if they don't have beautiful souls it reverberates there. Your resting expression indicates the type of person you are. Over time, this expression becomes your permanent face which is why I can tell who looks happy in a relaxed way versus the girls with anger, sadness or a beef with the world written on their faces. They have scowls on them. Look at yourself in the mirror with no expression on your face. You can see how other people see you. See more at tonykel.com
