Principles of Corporate Finance - Richard A. Brealey 2019-01-07
Brealey, Principles of Corporate Finance 13e describes the theory and practice of corporate finance. We hardly need to explain why financial managers must master the practical aspects of their job, but we should spell out why down-to-earth managers need to bother with theory. Throughout this edition, the authors demonstrate how managers use financial theory to solve practical problems. They also explore what financial managers should do to increase company value. Some of the biggest changes in this edition were prompted by the tax changes enacted in the U.S. Tax Cuts and Jobs Act passed in December 2017.

Financial & Managerial Accounting - Carl S. Warren 2016-09-14

Give your students a solid foundation in core accounting concepts while helping learners develop a true appreciation for why accounting is important to business and a prosperous society. Warren/Reeve/Duchac's FINANCIAL AND MANAGERIAL ACCOUNTING, 14E clearly demonstrates how accounting is much more than simply data and black and white rules. Instead, students see how accounting provides key information used to make critical business decisions. A new chapter schema provides context for how each chapter's content fits into the big picture. The book focuses on why accounting is important and consistently reinforces connections to the big picture by connecting journal entries to the accounting equation. Fresh organization progresses from the simplest to the more complex topics with reorganized and fully integrated coverage of the new Revenue Recognition standard, reorganized coverage of adjustments, and reorganized managerial accounting chapters Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Principles of Economics 2e - Steven A. Greenlaw 2017-10-11

COLLECTIVE INSTITUTIONS IN INDUSTRIALIZED NATIONS: Economic Lessons for sub-Saharan Africa - Samuel Enajero, Ph.D. 2015-12-08

Fundamental institutions are core values that originate from beliefs. Beliefs reflect on behaviors and repeated behaviors become habits. Shared habits are peoples' values, which when ingrained become norms and customs. Societies that believed in human interdependency formed collective institutions. These institutions are compatible with modern economic prosperity. Thus, Contrary to conventional economic teaching, which implies that behaviors, including preferences are biologically determined, all socially relevant behaviors, including economic behaviors are acquired, learned and routinized through habits (institutions) in which individuals find themselves. Again, contrary to popular beliefs that economics is about "pursuit of self-interest" as stipulated by Adam Smith (1776), the "pursuit of self-interest" does not translate to selfishness. For example, an entrepreneur relies on public capitals and skilled labors to succeed; a producer relies on adequate consumption to produce at capacity; a firm's profit is enhanced with higher consumer income, etc. Therefore, capitalism is a function of collective institutions. Collectivism is a solution to group interdependency. People sharing the same space are interdependent and are faced with interdependency costs. Interdependency cost equals external cost plus decision making cost. Failures to eliminate or minimize external costs (externalities) through collectivization of activities result to resource misallocation. The problem of sub-Saharan Africa. Moreover, modern development theories are constructed around macroeconomic variables. Money, banking, interest rate, savings, trade liberalization, financial assets, deficit and debt management are modern macroeconomic development tools. These are based on aggregation of data and variables. Thus, collectivism is more pronounced in macroeconomic policies. Yet, many emerging nations of sub-Saharan Africa, do not find it mandatory to build all-inclusive

economies by mobilizing resources en masse.
