Open Access in Theory and Practice - Stephen Pinfield 2020-07-09
Open Access in Theory and Practice investigates the theory-practice relationship in the domain of open access publication and dissemination of research outputs. Drawing on detailed analysis of the literature and current practice in OA, as well as data collected in detailed interviews with practitioners, policymakers, and researchers, the book discusses what constitutes 'theory', and how the role of theory is perceived by both theorists and practitioners. Exploring the ways theory and practice have interacted in the development of OA, the authors discuss what this

reveals about the nature of the OA phenomenon itself and the theory-practice relationship. Open Access in Theory and Practice contributes to a better understanding of OA and, as such, should be of great interest to academics, researchers, and students working in the fields of information science, publishing studies, science communication, higher education policy, business, and economics. The book also makes an important contribution to the debate of the relationship between theory and practice in information science, and more widely across different fields of the social sciences and humanities

Gender and Discourse - Clare Walsh 2016-02-17

Real Language Series General Editors: Jennifer Coates, Jenny Cheshire, Euan Reid This is a sociolinguistics series about the relationships between language, society and social change. Books in the series draw on natural language data from a wide range of social contexts. The series takes a critical approach to the subject, challenging current orthodoxies, and dealing with familiar topics in new ways. Gender and Discourse offers a critical new approach to the study of language and gender studies. Women moving into the public domains of power traditionally monopolised by men are creating new identities for themselves, and the language that is used by them and about them offers an insight into gender roles. Clare Walsh reviews the current dominance/difference debates, and proposes a new analytical framework which combines the insights of critical discourse and feminist perspectives on discourse to provide a new perspective on the role of women in public life. A superbly accessible book designed for students and researchers in the field, the book features: - topical case studies from the arenas of politics, religion and activism- a new analytical framework, also summarised in chart form so the reader can apply their own critical analyses of texts. - written and visual text types for the reader's own linguistic and semiotic analysis. 'This important book takes up a neglected question in the study of language and gender - what difference women make to the discourse of historically male-dominated institutions - and brings to bear on it both the insights of feminist scholarship and evidence from women's own testimony. Clare Walsh's analysis of the dilemmas women face is both

subtle and incisive, taking us beyond popular 'Mars and Venus' stereotypes and posing some hard questions for fashionable theories of language, identity and performance.

Speaking as Women Leaders - Judith Baxter 2016-09-20

This book offers new insights on how senior business women in Middle Eastern and Western companies use language for effective leadership in their respective management meetings. The book explores six case studies of women leaders, three in UK companies and three in a Bahraini company. The authors analyse meeting and transcript data to show that, in both cultural contexts, the women negotiate a range of gendered discourses such as 'hierarchy and status' and 'masculinisation' in order to manage their teams with authority and skill. The book challenges received wisdom about the opportunities and constraints each cultural context offers women in public life. While the UK women are constrained by chronic change and uncertainty in performing their roles effectively, the Bahraini women are far better supported by their bosses, yet are constrained by patriarchal assumptions of what constitutes effective leadership. The book demonstrates the use of Feminist Poststructuralist Discourse Analysis (FPDA), which is applied by scholars worldwide yet has relatively few published models of practice.

Gender in Interaction - Bettina Baron 2002-04-12

In this volume, gender is seen as a communicative achievement and as a social category interacting with other social parameters such as age, status, prestige, institutional and ethnic frameworks, cultural and situative contexts. The authors come from a variety of backgrounds such as sociology of communication, anthropological linguistics, sociolinguistics, social psychology, and text linguistics. Masculinity and femininity are conceived of as varying culturally, historically and contextually. All contributions discuss empirical research of communication and the question of whether (and how) gender is a salient variable in discourse. So, one aim of the book is to trace the varying relevance of gender in interaction. Emotion politics, ideology, body concepts, and speech styles are related to ethnographic description of the contexts within which communication takes place. These contexts range from private to public communication, and from mixed-sex to same-sex conversations framed by different cultural backgrounds (Australian, German, Georgian, Turkish, US-American).

Between the Theory and Practice of Democracy in Nigeria - Elochukwu C. Amucheazi 2008

Obasanjo's first term in office as a civilian president (1999 - 2003) was a major litmus test for the future of Nigeria's fledgling democracy. Set in a critical conjuncture characterized by high popular expectations and international goodwill on the one hand and weak institutions and deep-seated social cleavages exacerbated by years of military rule on the

other, the new civilian governments at the Federal and State levels were expected to quickly deliver the "dividends of democracy" to prevent an authoritarian throwback. The expectations included a quick improvement in social service delivery, ending egregious human rights violations of the military era, improving infrastructure, strengthening institutions of governance and creating jobs. But how did the Obasanjo regime fare in meeting the citizens' expectations in its first term in office? What were the challenges faced by practitioners in all the branches and levels of government in achieving their electoral promises and public expectations? And how did they respond to those challenges? In this book, some of Nigeria's leading academics dialogue with politicians who hold or have held key political positions, including Governor Ibrahim Idris of Kogi State, former state governors Orji Kalu, Sam Egwu and Chris Ngige, as well as other key political practitioners to find answers to some of the above questions. The contributors address numerous thorny issues in Nigerian politics and governance including federalism and presidentialism, elections and the electoral process, the judiciary and courts, parties and the party system, the economy, as well as foreign policy. Specifically, they address the issues of executive-legislative relations, executive-judiciary relations, party-government relations, Federal and State relations and the relations between President Obasanjo and State Governors that he regarded as recalcitrant. The book is unique in that it departs from the conventional academic balance sheet approach of matching popular expectations against government's service delivery to actually incorporate the views and experiences of the practitioners in the field. This is done not for self-justificatory purposes, but to genuinely articulate and perspectivise the challenges the practitioners faced and their own efforts at coping with such challenges.

Leaders Eat Last - Simon Sinek 2014-01-07

The New York Times bestseller by the acclaimed, bestselling author of Start With Why and Together is Better. Now with an expanded chapter and appendix on leading millennials, based on Simon Sinek's viral video "Millenials in the workplace" (150+ million views). Imagine a world where almost everyone wakes up inspired to go to work, feels trusted and valued during the day, then returns home feeling fulfilled. This is not a crazy, idealized notion. Today, in many successful organizations, great leaders create environments in which people naturally work together to do remarkable things. In his work with organizations around the world, Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other. Other teams, no matter what incentives are offered, are doomed to infighting, fragmentation and failure. Why? The answer became clear during a conversation with a Marine Corps general. "Officers eat last," he said. Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield: Great leaders sacrifice their own comfort--even their own survival--for the good of those in their care. Too many workplaces are driven by cynicism, paranoia, and self-interest. But the best ones foster trust and cooperation because their leaders build what Sinek calls a "Circle of Safety" that separates the security inside the team from the challenges outside. Sinek illustrates his

ideas with fascinating true stories that range from the military to big business, from government to investment banking.

[The Wrong War \(Enhanced Edition\)](#) - Bing West 2011-02-22

The Wrong War enhanced eBook takes you inside the front lines with exclusive video shot by the author while embedded with U.S., British, and Afghan troops over the course of two years. You will witness the firefights as they happened and see the problems soldiers faced on the ground in Afghanistan. Included in the eight videos are: • Never-before-seen footage from firefights in key hot spots such as Ganjigal in Konar Province and Marja in Helmand Province • A bare-faced look at counterinsurgency tactics (COIN) and the positive and negative outcomes from U.S. efforts • Actual video of the threats faced by troops in Afghanistan including IEDs, Taliban snipers, and suicide bombers • The struggles of U.S. and British forces to effectively work with Afghan troops to counter the insurgency • In their own words, the experiences of the U.S. soldiers in battle America cannot afford to lose the war in Afghanistan, and yet Americans cannot win it. In this definitive account of the conflict, acclaimed war correspondent and bestselling author Bing West provides a practical way out. Drawing on his expertise as both a combat-hardened Marine and a former assistant secretary of defense, West has written a tour de force narrative that shows the consequences when strategic theory meets tactical reality. Having embedded with dozens of frontline units over the past two years, he takes the reader on a battlefield journey from the mountains in the north to the opium fields in the south. West—dubbed “the grunt’s Homer”—shows why the Taliban fear the ferocity of our soldiers. Each chapter, rich with vivid characters and gritty combat, illustrates a key component of dogged campaigns that go on for years. These never-ending battles show why idealistic theories about counterinsurgency have bogged us down for a decade. The official rhetoric denies reality. Instead of turning the population against the Taliban, our lavish aid has created a culture of entitlement and

selfishness. Our senior commanders are risk-averse, while our troops know the enemy respects only the brave. A fighter who understands strategy, West builds the case for changing course. As long as we do most of the fighting, the Afghans will hold back. Yet the Afghan military will crumble without our combat troops. His conclusion is sure to provoke debate: remove most of the troops from Afghanistan, stop spending billions on the dream of a modern democracy, transition to a tough adviser corps, and insist the Afghans fight their own battles. Amid debate about this maddening war, Bing West’s book is a page-turner about brave men and cunning enemies that examines our realistic choices as a nation.

A Game Plan for Effective Leadership - Ed. D Palestini 2008-07-17

The conventional wisdom is that leaders are born, not made. Author Robert Palestini argues that his experience and scholarly research indicate that leadership skills can be learned. The first chapter of this book speaks to the so-called 'science' of administration and leadership, while the second chapter deals with the 'art' of leadership. One needs to learn how to lead with both mind (science) and heart (art) to be truly effective. The effective building blocks of quality leadership are the skills of communication motivation, organizational development, management and creativity. Mastering the theory and practice in these areas of study will produce high quality leadership ability and, in turn, produce successful leaders. This book uses the case study approach in order to facilitate placing theory into effective practice. Each chapter contains an extensive study on one of ten of the most successful basketball coaches of our times including, Phil Jackson, Bobby Knight, Mike Krzyzewski, Pat Riley, Pat Summitt, and Dean Smith. The book looks to see how these coaches were able to place leadership theory into effective practice. The lessons learned will prove invaluable to leaders and aspiring leaders, whether they be a parent, teacher, school principal, athletic director, coach or CEO.

Women Entrepreneurs - Sandra J. Wells 2021-12-13

First Published in 1998. Female entrepreneurs represent a rapidly growing element of corporate America, as evidenced in The National Women's Business Council's 1991 Annual Report to the President of the United States and Congress. Given that so much of the business of America is composed of organizations started and run by women, a sobering statistic presented in the same report attests to the failure rate of these businesses: women-owned businesses fail at a rate seven to eleven percent higher than businesses owned by men. Given the theoretical foundation of the nature of adult learning, this research explored the phenomenon of learning for a select group of adult learners, a group of successful female entrepreneurs.

The 5 Levels of Leadership - John C. Maxwell 2011-10-04

Use this helpful book to learn about the leadership tools to fuel success, grow your team, and become the visionary you were meant to be. True leadership isn't a matter of having a certain job or title. In fact, being

chosen for a position is only the first of the five levels every effective leader achieves. To become more than "the boss" people follow only because they are required to, you have to master the ability to invest in people and inspire them. To grow further in your role, you must achieve results and build a team that produces. You need to help people to develop their skills to become leaders in their own right. And if you have the skill and dedication, you can reach the pinnacle of leadership—where experience will allow you to extend your influence beyond your immediate reach and time for the benefit of others. The 5 Levels of Leadership are: 1. Position—People follow because they have to. 2. Permission—People follow because they want to. 3. Production—People follow because of what you have done for the organization. 4. People Development—People follow because of what you have done for them personally. 5. Pinnacle—People follow because of who you are and what you represent. Through humor, in-depth insight, and examples, internationally recognized leadership expert John C. Maxwell describes each of these stages of leadership. He shows you how to master each level and rise up to the next to become a more influential, respected, and successful leader.
