Crafting Tradition - Michael Chibnik 2010-01-01

Since the mid-1980s, whimsical, brightly colored wood carvings from the Mexican state of Oaxaca have found their way into gift shops and private homes across the United States and Europe, as Western consumers seek to connect with the authenticity and tradition represented by indigenous folk arts. Ironically, however, the Oaxacan wood carvings are not a traditional folk art. Invented in the mid-twentieth century by non-Indian Mexican artisans for the tourist market, their appeal flows as much from

intercultural miscommunication as from their intrinsic artistic merit. In this beautifully illustrated book, Michael Chibnik offers the first in-depth look at the international trade in Oaxacan wood carvings, including their history, production, marketing, and cultural representations. Drawing on interviews he conducted in the carving communities and among wholesalers, retailers, and consumers, he follows the entire production and consumption cycle, from the harvesting of copal wood to the final purchase of the finished piece. Along the way, he describes how and why this "invented tradition" has been promoted as a "Zapotec Indian" craft and explores its similarities with other local crafts with longer histories. He also fully discusses the effects on local communities of participating in the global market, concluding that the trade in Oaxacan wood carvings is an almost paradigmatic case study of globalization.

High Society in the Third Reich - Fabrice D'Almeida 2008-12-22

This book is the first systematic study of the relations between German high society and the Nazis. It uses unpublished

archival material, private diaries and diplomatic documents to take us into the hidden areas of power where privileges, tax breaks, and stolen property were exchanged. Fabrice D'Almeida begins by examining high society in the Weimar period, dominated by the old imperial aristocracy and a new republican aristocracy of government officials and wealthy businessmen. It was in this group that Hitler made his social debut in the early 1920s through the mediation of conservative friends and artists, including the family of the composer Richard Wagner. By the end of the 1920s, he enjoyed wide support among socialites, who played a significant role in his access to power in 1933. Their adherence to the Nazi regime, and the favors they received in return, continued and even grew until defeat loomed on the horizon. D'Almeida shows how members of German high society sought to outdo each other in showing zealous support for Hitler, how the old

elites starting with the Kaiser's sons partied alongside parvenus, and how actors, aristocrats, SS technocrats, and diplomats came together to form a strange imperial court. Women also played a role in this theatre of power; they were persuaded that they had gained in dignity what they had lost in civil rights. There emerges a fascinating and disturbing picture of a group that allowed nothing - not war, the plundering of Europe, nor the extermination of peoples - to alter their cynical enjoyment of pleasures: hunting, regattas, the opera, balls, dinners and tennis. More than a study of a class or a chronicle, this book lifts the veil that has concealed a society that used secrecy to protect itself. *High Society in the Third Reich* makes an important and unique contribution to the current reevaluation of the extent to which German society, including German high society, was responsible for Hitler's accession to power and the crimes that were committed by his regime.

The Janissary File - Gerhard Behrens 2007-03

In late 1982 a woman was found murdered in a ditch near a village in Lower Egypt. She was not the usual victim of some family feud or a crime of honour, but a well-known personality, and the subject of parliamentary debates and vitriolic attacks in the media. A formidable, if slightly arrogant, Turkish lawyer, she had been pursuing a ruthless campaign to acquire vast stretches of agricultural and urban land that had been turned into Islamic trusts centuries earlier by the Ottoman ruling class and were later dissolved by President Nasser. Thousands of Egyptians with genuine or alleged Turkish ancestors were lured into a scheme to get rich by cannibalising the age-old family trusts. Yet there were others with different motives- they wanted to get rid of a troublesome foreigner who in their view was abusing the law and had become a danger to society. The fictitious plot unfolds against the real social and legal background of Egypt

in the 1980s with the property campaign at its peak. This is a historical novel that will appeal to those who love a good detective story as well as to anyone interested in the Middle East, its history and its present.

Is Your Thinking Keeping You Poor? - Douglas Kruger

2016-08-01

'Thinking like a poor person will keep you poor. Thinking like a wealthy person will make you wealthy. I would like to show you exactly what the differences between the two ways of thinking are and how you can use them in your favour.' - Douglas Kruger - Douglas Kruger Being rich is

not normal: most people never achieve wealth in their lifetime. The very word 'rich' describes a state beyond the median, and therein lies an important lesson. To become rich, you will have to think radically differently from the way most people around you think. Do you know what those specific differences may be? Business and wealth guru Douglas Kruger strips away the feel-good hype and gets right down to the practical principles. He leads you through the types of thinking that hold individuals, families and businesses in generational cycles of poverty. He explores the dramatically different approaches of the self-made rich and super-rich, showing you which behaviours to begin practising and which behaviours are traitorous to your wealth potential. Escape poverty. Raise your value. Change the trajectory of your story. It all begins with the way you think.

Training for Work in the Informal Micro-Enterprise Sector - Hans Christiaan Haan 2006-10-04

In Sub-Saharan Africa, the sector of informal micro-enterprises (IMEs) is already

employing a large share of the labour force in both urban and rural areas. This study reviews the ways in which the owners and workers of IMEs have acquired their vocational and management skills. It reviews the contributions of all the different training providers, including public sector training institutes, private sector training providers, and training centres run by NGOs and other non-profit organizations. The study finds that informal apprenticeship training is by far the most common source of various skills - in some countries it is likely to be responsible for 80-90% of all ongoing training efforts. Informal apprenticeship training presents a number of important advantages. At the same time it has a number of limitations. The study concludes that there is a major challenge to improve the transfer of relevant skills to IME operators, both through pre-employment training and skills upgrading. In view of the scope of the challenge to provide hundreds of thousands

IME owners and workers, as well as large numbers of out of school youths with relevant practical and management skills, it suggests to build upon the strengths of the existing practices of informal apprenticeship training and to remedy its weaknesses by involving professional training providers in upgrading its training organization and delivery, quality and efficiency, and final training outcomes. It reviews the results of a number of innovative interventions in different African countries that are working in this direction. Finally, the study suggests that there is an interesting potential in 'business-embedded training' provided by private companies as part of their regular business operations.
