[I'm Deaf, Not Blind](#) - Caroline De Groot 2012-02

Seminar paper from the year 2011 in the subject Art - Photography and Film, grade: 16/20, University of Exeter, language: English, abstract: Alejandro González Iñárritu's kaleidoscopic 'Babel' puts an end to a twist of fates trilogy that previously began with 'Amores perros/Love's' a Bitch and '21 grammos/21 Grams'. Like these, it plays with time to recount stories linked by a terrible incident, i.e, here the unintentional shooting of an American traveller by two Moroccan children. Its title obviously refers to the Genesis episode occurring in the city of Babel: Noah and his sons want to erect a tower to reach the skies but they soon get punished by God who creates different languages dividing human beings. As language is the fundamental source of any interchange, one may conclude from the title that the first topic Babel sets out is related to communication. This essay aims to display how the film deals with this latter theme with reference to, first, the narrative structure and, finally, some audacious film techniques. Since this paper is limited, we will only discuss this issue from a broad perspective.

A Practical Guide to the Evaluation of Child Physical Abuse and Neglect - Angelo P. Giardino 2010-06-09

As we near the 50th anniversary of the landmark article by C. Henry Kempe and his colleagues entitled "The Battered Child Syndrome", which ushered in the modern era of professional attention by pediatricians and other child health professionals, we have reason for both celebration and concern. We can take heart that over the recent decades, a great deal of professional attention focused on the problem of child abuse and neglect. In every state of the country, there are mandatory reporting laws that require nurses, physicians, and social workers to report suspicions of maltreatment to the appropriate authorities for investigation. The act of reporting provides legal immunity to the reporter except when performed in bad faith. Progress in understanding the factors that place children at risk for harm from physical abuse and neglect now permits prevention and intervention. The peer-reviewed literature dealing with child abuse and neglect has proliferated with high quality work being done and reported on the many dimensions related to the epidemiology, mechanism, treatment, and prognosis of child maltreatment. Efforts are being directed toward developing an evidence-based approach to the prevention of child abuse and neglect. These are some of the positives. However, negatives exist and remain reasons for concern. Despite a tremendous amount of attention to the problem of maltreatment, there are at least 3 million reports of suspected child abuse and neglect made annually, with nearly 1 million cases being substantiated.

The Medical Interview - Mack Jr. Lipkin 2012-12-06

Primary care medicine is the new frontier in medicine. Every nation in the world has recognized the necessity to deliver personal and primary care to its people. This includes first-contact care, care based in a positive and caring personal relationship, care by a single healthcare provider for the majority of the patient's problems, coordination of all care by the patient's personal provider, advocacy for the patient by the provider, the provision of preventive care and psychosocial care, as well as care for episodes of acute and chronic illness. These facets of care work most effectively when they are embedded in a coherent integrated approach. The support for primary care derives from several significant trends. First, technologically based care costs have rocketed beyond reason or availability, occurring in the face of exploding populations and diminishing real resources in many parts of the world, even in the wealthier nations. Simultaneously, the primary care disciplines-general internal medicine and pediatrics and family medicine-have matured significantly.

Interview Intervention - Andrew LaCivita 2012-03-15

If you are interviewing with a company, you are likely qualified for the job. Through the mere action of conducting the interview, the employer essentially implies this. So why is it difficult to secure the job you love?

Skype: Bodies, Screens, Space - Robyn Longhurst 2016-09-13

Despite the popularity of Skype with video many of us are still figuring out how to 'do' it. Interviews reveal that we can now run the programme but we are less certain about how to 'perform' in front of the webcam. Seeing ourselves in the box on the side can feel strange. We are not quite sure which bits of our bodies to display on the screen, how much to move around the room, or move the device around the room. Is it acceptable to use Skype with video at a funeral, in crowded spaces or while in bed? This book addresses how people are emotionally and affectually connecting with others audio-synchronously on the screen in a variety of different spatial contexts. Topics include Skype with video being used by grandparents to connect with grandchildren, friends and family using it for special occasions, and partners using it for romance and sex. Theories addressing bodies, gender, queerness, phenomenology and orientation inform the research. It concludes that while Skype does not

offer some kind of utopian future, it does open up possibilities for

existing power relations to be filtered through new lines of sight/site which are shaping what bodies can do and where.
