The History of the Jews in Early Modern Italy - Marina Caffiero 2022

"Challenging traditional historiographical approaches, this book offers a new history of Italian Jews in the Early Modern age. The fortunes of the Jewish communities of Italy in their various aspects- demographic, social, economic, cultural, and religious-can only be understood if these communities are integrated into the picture of a broader European, or better still, global, system of Jewish communities and populations; and, secondly, that this history should be analyzed from within the dense web of relationships with the non-Jewish surroundings that enveloped the Italian communities. The book presents new approaches on such essential issues as ghettoization, antisemitism, the

Inquisition, the history of conversion and Jewish-Christian relations. It sheds light on the autonomous culture of the Jews in Italy, focusing on case studies of intellectual and cultural life using a micro-historical perspective. First published in Italy in 2014 by one of the leading scholars on Italian Jewish history. This book will appeal to students and scholars alike studying and researching Jewish History, Early Modern Italy, Early Modern Jewish and Italian culture, and Early Modern society"--

Nuovi itinerari alla scoperta del greco antico - Francesco Michelazzo 2019-07-08

Frutto di molteplici esperienze didattiche - in particolare, il corso-base di greco per studenti universitari e il corso di Didattica della lingua greca presso la Scuola di Specializzazione all'Insegnamento Secondario toscana (SSIS) -, questo libro risponde a una duplice esigenza: essenzializzare e razionalizzare lo studio del greco antico (mostrando l'interdipendenza tra i vari piani linguistici e aiutando così a fare sinergia tra fenomeni diversi) e valorizzare

adeguatamente aspetti importanti di solito trascurati o marginalizzati (come la semantica, l'organizzazione del testo, la stessa sintassi). Di pari passo con lo studio morfologico, il lettore è condotto a riflettere su tutte le più importanti strutture linguistiche del greco, in un percorso graduale che supera la rigida scansione tradizionale degli argomenti e mette anche a frutto insospettite analogie con fenomeni espressivi delle lingue moderne.

Poggio Civitate (Murlo) - Anthony Tuck 2021-06-15
Poggio Civitate in Murlo, Tuscany, is home to one of the best-preserved Etruscan communities of the eighth through the sixth centuries BCE. In this book, Anthony Tuck, the director of excavations, provides a broad synthesis of decades of data from the site. The results of many years of excavation at Poggio Civitate tell a story of growth, urbanization, ancient industrialization, and dissolution. The site preserves traces of aristocratic domestic buildings, including some of the most evocative and enigmatic architectural sculpture in the region, along with remnants of non-elite domestic spaces, enabling illuminating comparisons across social strata. The settlement also features evidence of large-scale production systems, including tools and other objects that reflect the daily experiences of laborers. Finally, the site contains the story of its own

destruction. Tuck finds in the data clear indications that Poggio Civitate was methodically dismantled, and he posits hypotheses concerning the circumstances around this violent social and political act.

La Politica Economica dei Paesi in via di Sviluppo - Giovanni Andrea Cornia 2022-02-23

Questo manuale nasce dalla necessità di fornire una trattazione completa in lingua italiana dei temi di politica economica per i paesi in via di sviluppo, trattazione che è stata finora mancante. La Parte 1 fornisce strumenti metodologici derivati dalla teoria delle scelte collettive. La Parte 2 discute le riforme macroeconomiche ortodosse ed eterodosse. La Parte 3 illustra invece le politiche interne nel campo di sicurezza alimentare, riforma agraria, sostenibilità, tassazione, spesa sociale, mercato del lavoro e politiche demografiche. La Parte 4 analizza poi le riforme del settore estero, compresa la migrazione internazionale. Per ultimo, la Parte 5 illustra

l'esperienza storica di cinque regimi di politica economica succedutesi dalla decolonizzazione fino ad oggi. L'approccio teorico seguito parte dall'impatto su crescita, distribuzione e benessere delle politiche effettivamente applicate. Nel caso di un loro insuccesso, si propongono alternative d'ispirazione strutturalista-keynesiana. Constructing Messapian Landscapes - G.-J. L. M. Burgers 1998

Over the last three decades, archaeologists have progressively embarked on field-walking projects all around the Mediterranean basin. The aim of most of these projects is to investigate the ancient settlement and landscape dynamics of specific Mediterranean regions. They greatly contribute to the new liveliness which characterizes present-day classical archaeology, not only by introducing new research methods but also, and in particular, by widening its subject matter to include the history of societies in the

margins of the Graeco-Roman urban world. It is within this recent tradition that the present book has been written; the author aims to examine the ancient settlement and societal dynamics of the Brindisi region, in the north-east of the Salento peninsula. The field surveys indicate that during the pre-Roman period the regional society was characterized by processes of centralization and urbanization. Subsequently, from the 3rd century BC onwards, it gradually integrated into the Roman orbit. Burgers emphasizes an active indigenous role in the successive colonial situations in southern Italy. He focuses on the internal dynamics of the local communities and investigates how social strategies manifested themselves, especially in external contacts and in the organization of settlement and landscape.

Non-scribal Communication Media in the Bronze Age Aegean and Surrounding Areas

- Anna Margherita Jasink 2018-01-08

This volume is intended to be the first in a series that will focus on the origin of script and the boundaries of non-scribal communication media in proto-literate and literate societies of the ancient Aegean. Over the last 30 years, the domain of scribes and bureaucrats has become much better known. Our goal now is to reach below the élite and scribal levels to interface with non-scribal operations conducted by people of the 'middling' sort. Who made these marks and to what purpose? Did they serve private or (semi-) official roles in Bronze Age Aegean society? The comparative study of such practices in the contemporary East (Cyprus, Anatolia, the Levant, and Egypt) can shed light on sub-élite activities in the Aegean and also provide

evidence for cultural and economic exchange networks.

Mycenaean Pottery -

Penelope A. Mountjoy 1993

The aim of this handbook is to make Mycenaean pottery more accessible to the general reader by presenting a brief description of the different types, placing it against its archaeological and historical background. Mountjoy expands on the illustrations from her 1986 guide Mycenaean Decorated Pottery to include material from different areas of Greece, allowing an examination of the exchange and trade of Mycenaean pottery. Particular emphasis is made to the definition of ceramic phases, for although imprecise, changes in pottery style are the best chronological measure for the Aegean Bronze Age.

Course notes on finite games and rational choice - Riccardo Bruni 2019-02-11

This book collects notes that were prepared for a university course taught in the Spring of 2018, and delivered to an audience of students enrolled in the Master course in Logic,

philosophy and history of science of the University of Florence. The goal of the course was to introduce students to some basic concepts from the area of research generally known as decision theory. This is done by focussing on the concept of 'rational choice', which is analyzed, methodologically speaking, by the means of the theory of games. To minimize prerequisites it was decided to restrict the attention to the theory of finite games in particular. The topics treated are vary, and belongs to both the theory of games 'in normal form' as well as that of games 'in extensive form', as they are usually referred to. The classical issues in both fields, such as the theory of 'equilibria' and the study of properties such as determinacy, are carefully discussed to make them clear to beginners and are addressed from a novel perspective which makes use of formal methods that are typical of researches connected with the study of logic.

Pictorial Assessment of Interpersonal Relationships (PAIR) - Anna Silvia Bombi

LEZIONI DI SISTEMI DINAMICI - Riccardo Ricci
2017

Dionysius and The History of Archaic Rome - Emilio Gabba 1991
In The History of Archaic Rome, Dionysius purposely viewed Roman history as an embodiment of all that was best in Greek culture. Gabba places Dionysius's remarkable thesis in its cultural context, comparing this author with other ancient historians and evaluating Dionysius's treatment of his sources. In truth, the last decades B.C. made the historian's task an enormous challenge. On the one hand, the ancient writers knew Rome to be the greatest empire the world had seen, seemingly impregnable in military power and still capable of expansion. On the other hand, they were acutely aware that it recently had barely

survived half a century of civil strife. Gabba recalls to us how little was confidently known of Rome's actual origins in an illuminating examination of Dionysius's methodology as a historian.

Sparta - Stephen Hodkinson

Regional Pathways to Complexity - P. A. J. Attema 2010

Deze bundel is een mijlpaal in het onderzoek naar de Oude Middellandse Zee. Met behulp van een vergelijkende aanpak, zijn drie verschillende regionale landschappen van Italië uitvoerig onderzocht door archeologen. Om een zeer gedetailleerd beeld te krijgen van de ontwikkeling van menselijke activiteiten van de late Bronstijd tot de opkomst van het Romeinse Rijk, is er minutieus onderzoek gedaan naar nederzettingen, heiligdommen en begraafplaatsen. De milieugeschiedenis van deze gebieden en de geschiedenis van het door mensen gebruikte land zijn parallel geanalyseerd door gespecialiseerde projecten. Wat ontstaat, is een ongeëvenaarde reeks van inzichten in hoe regionale samenlevingen zich intern ontwikkelen en reageren op externe interventies zoals het kolonialisme, imperialisme en internationale handel.

Archaeological Chemistry -

Zvi Goffer 2006-08-04

The chemical study of archaeological materials Archaeological Chemistry, Second Edition is about the application of the chemical sciences to the study of ancient man and his material activities. The text of the book centers on the use of chemical methods, but also refers to the contributions of

physics, biology, and genetics to archaeological research.

Subjects discussed in the book include the determination of the nature of ancient materials, their provenance and age, the technologies used for the production of man-made materials, and the analysis of ancient human and animal remains (such as bone, dried blood, and coprolites), which yields information on ancient diets, kinship, habitancy, and migratory patterns. New developments in analytical chemistry and in related disciplines, which have contributed to archaeological research since the first edition of the book was published, are dealt within this edition, which also includes: * Updated information on the study of the nature, age, and provenance of ancient materials * New sections on organic, biological and genetic studies * Glossary * Extensive bibliography The book is intended primarily for archaeologists, physical anthropologists and students of archaeology and physical anthropology, but will

also be of use to conservators, curators, and art historians. Natural scientists reading it will become acquainted with advances in archaeological research which were made possible only by the application of chemical, physical, and biological methods and techniques.

Preistoria e Protostoria egea e cipriota - Anna Margherita Jasink 2015-10-27

Questo volume si propone come una introduzione allo studio delle culture preclassiche - minoica, micenea, cicladica e cipriota - che si sviluppano fra il III e il I millennio a.C. nel bacino dell'Egeo e del Mediterraneo orientale. Dall'analisi delle evidenze archeologiche, legate alla cultura materiale e alle produzioni artistiche, e della documentazione epigrafica emerge un quadro delle strutture politiche, economico-sociali e religiose in cui si riconoscono fenomeni di continuità e relazioni culturali profonde. Prima ancora della preistoria greca, è questa la storia di una realtà composita,

ancora lontana dall'essere compresa appieno, ma che ha un fascino legato ad antichi miti e alla sua capacità di espandersi e interagire con le altre civiltà mediterranee e del Vicino Oriente.

The Scientific Study of Flint and Chert - G. de G. Sieveking 2011-07-14

The thirty papers in this 1986 volume review the scientific knowledge of the nature of flint and chert at this time. These papers were presented at a 1983 interdisciplinary and international conference on flint and other cherts. Each contribution has been meticulously assessed and edited prior to publication. This collection is principally concerned with the geology

and geochemistry of flint in European chert. Topics include the origin of flint; scanning electron microscopy of surface textures; and the behaviour of flint under periglacial conditions. There is a companion volume, edited by G. de G. Sieveking and M. B. Hart, on the archaeological uses of flint.

The Living Goddesses -

Roman Soldier Operations

Manual - Chris McNab

2019-08-27

The history of the Roman Empire and its technological and military prowess resounds through the ages. At its height, the empire covered five million square kilometres and held sway over 70 million people. How did a small city state in

Latium achieve such prominence and carve an empire against which all other empires are measured? The answer is, in part, the Roman Legionary. It was Roman soldiers who carved out a foothold in Italy from warring neighbours. It was the legions who made safe the empire from external menaces - such as the Carthaginians, Greeks and Parthians - and who defeated fierce tribal leaders such as Boudicca in Britain and Vercingetorix in Gaul. It was the Roman legionaries who did much of the early building in these provinces and who policed the new borders. They maintained internal order, crushed rebellions by subjects or slaves, and provided the necessary muscle for imperial governors. Unique in so many ways, the Roman Army was the most feared fighting force of the ancient world, partly because of its outstanding discipline and organisation, but also because the men who made up its legendary legions were well trained, experienced warriors. The Roman Soldier

Operations Manual gets to grips with what we know about the men of the legions, and includes fascinating detail on

kit, equipment, weapons and insignia, as well as their unique fighting formations and battle tactics.
